

# Super Flush Cut Power Head

## Super Flush Cut

Super Flush Flush Cut Hydraulic Chainsaw. This concrete hydraulic chainsaw is a prime example of innovative, ergonomic, powerful, rugged, lightweight design.

Designed to make the operator's life easier, The lighter weight makes it easier to work in tight spaces, on ladders, platforms, and underwater. A front "Tiger Grip" provides guide and leverage in the cut, reducing operator fatigue. Super Flush Cut uses the same bar and chain as the popular models saws on the market. The bar mounting system uses a machined block to increase strength and life.

- 0.1875" Super Flush Cut
