Differentiators

Imagine a mechanic telling a client what is broken on their truck without ever looking under the hood of the vehicle. There is no "one-size-fits-all" solution when it comes to IT and Cybersecurity. CSM takes a methodical and inquisitive approach to conquering business and security problems with tailored, technology based solutions.

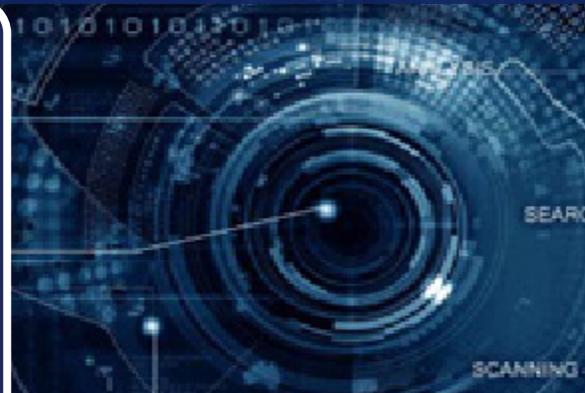

SOC as a SERVICE

(SOCaaS)

LEARN WHAT IT IS AND HOW
YOU CAN BENEFIT FROM IT.

CSM International offers comprehensive and carefully tailored approaches to digital security in order to meet our clients' specific needs.

We operate an innovative, 24/7 Security Operations Center, that employs best in class processes, procedures, and tactics to detect, respond, and deploy offensive countermeasures.

QUALITY

Our analysts all must perform as level III and level IV engineers.

EXPERIENCE

Our team has performed its duties in highly regulated industries without a single security breach.

COST

We provide these services at a flexible and transparent cost to meet your needs.

WHAT IS CMMC?

The Cybersecurity Maturity Model Certification was developed in response to the growing number of aggressive cyberattacks on the Department of Defense, and the contractors it employs. It consists of 5 levels and is intended to be the standard for protecting controlled unclassified information (CUI), as well as federal contract information (FCI).

HOW DOES IT AFFECT MY ORGANIZATION?

By October 2025, all prime and subcontractors who do business with DoD will have to become CMMC certified to remain compliant.

HOW CAN YOU HELP ME?

To put it simply, we help you get certified. CSM International would perform a rigorous pre-assessment of your systems and security plan, then offer suggestions or conduct remediation if needed.

CSM INTERNATIONAL IS A CMMC RPO

WORK FROM HOME SOLUTION

Our work from home solutions are ideal for businesses that want to maintain consistency in their security plans while their employees work from home. We work closely with our clients to tailor a package specific to their own needs. There is no one size fits all when it comes to cybersecurity.

Protecting your world

Physical Access Controls

Secure site management, control, and access

CSM International offers flexible, integrated access control solutions to meet your security and business requirements.

Efficiently and reliably manage multiple access points to control risk, improve business efficiency, ensure business continuity, and increase profitability.

Fully integrate access control, intruder alarms, perimeter security and business policy execution - delivering unparalleled business efficiencies.

Perimeter Security

Deter and detect

Perimeter fences must be highly reliable, difficult to bypass and not generate false alarms, even in adverse conditions.

Gallagher delivers robust perimeter security systems suited to the most rigorous requirements of high security sites.
