ABOUT US

How it Started...

Life can grow from even the most destructive of forces; earthquakes shifting the earth's ground but can cause some of the planets' most valuable resources to form, and while lava scorches the earth in its wake it replenishes the soil. Transforming it into a fertile space for emerging life to grow. Bringing new opportunities to highlight the critical moments in our lives. Because at their core, volcanoes are an amalgamation of crystallized minerals, rocks, gases, and hot liquids that ultimately erupts into the fiery trail we all know as lava.

And at our core, instead of minerals, Ideas. Instead of rocks, Resources. Instead of gases, Teamwork. And instead of hot liquids, Passion & Determination. Much like a volcano's eruption our output culminates in a sizzling flow of personalized events, exceptional decorations, dedicated operations, and professional staff. That ignite each occasion's potential, creating new opportunities for growth in its fiery trail, and allowing us to be worthy of the name: Lava Events.
