

Signal-Wise: we get the signal right

Sound Viewer

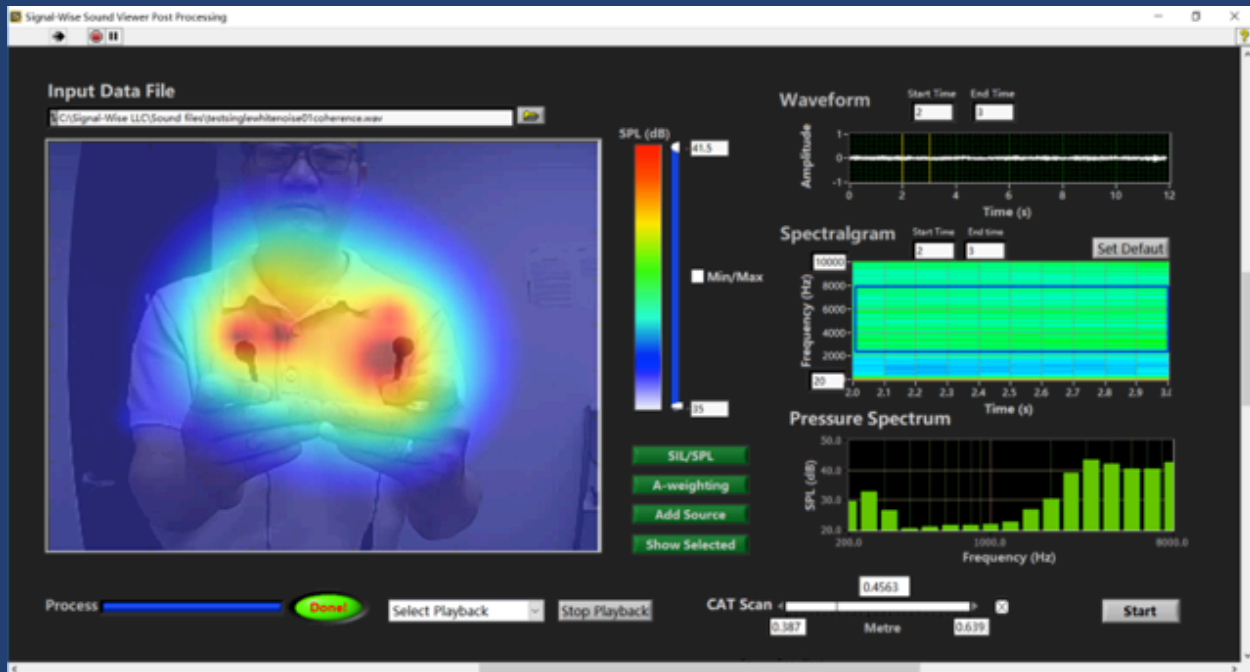

Coherent Sources

Sound Viewer is capable of handling both incoherent and coherent, broadband and narrow-band sound sources in 3D space simultaneously over the frequency range of 20 – 20,000 Hz.

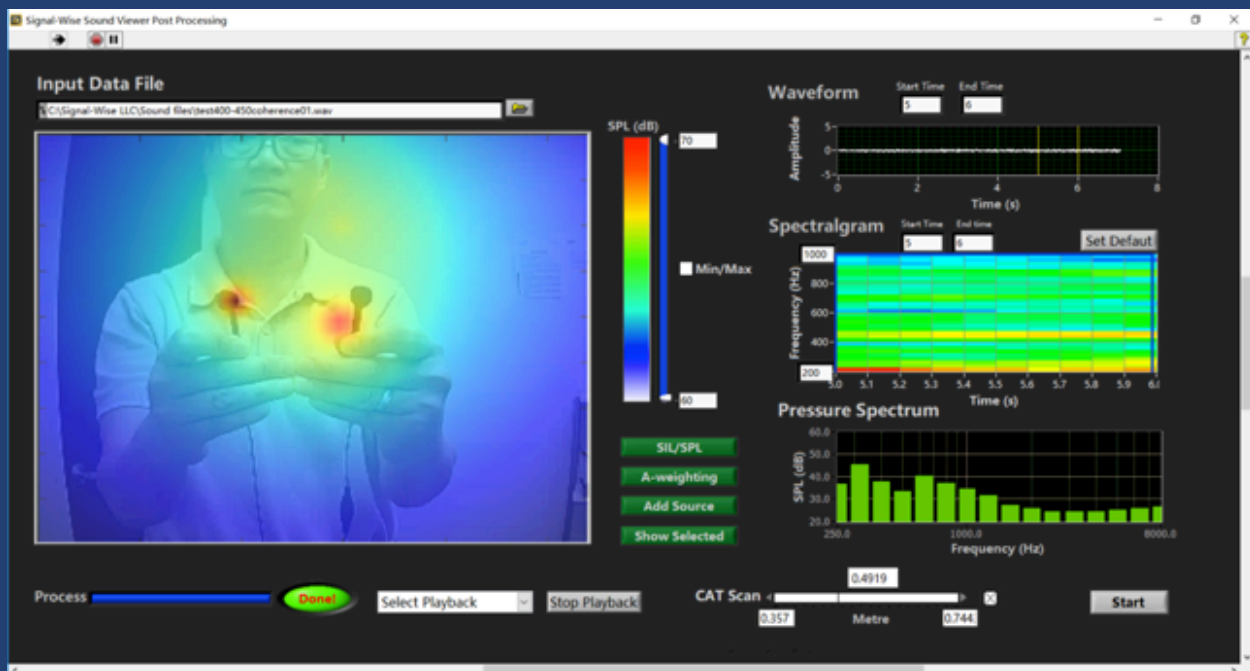

Sound Viewer — A one-of-a-kind comprehensive noise diagnosis and analysis system.

Signal-Wise: we get the signal right

Two earphones emitting the coherent broadband sounds that were generated by the same laptop computer were located. The separation distance between these earphones was less than 20 cm, much shorter than the wavelengths of the sound waves.

Two earphones emitting the coherent narrow-band sounds that were generated by the same laptop computer were located. The separation distance between these earphones was less than 20 cm, much shorter than the wavelengths of the sound waves.
