

INTRODUCING TOM & RAHEEL

We now have inhouse Root Canal Treatment expertise. Tom is an award winning Endodontist and is available at Kelsey Park Dental every other Wednesday. Ask for more details, or book a consultation online.

We also welcomed Raheel to the team in January, bringing our total team size to 13. Raheel joins as an Associate Dentist, alongside Liane and Monica. Also say hi to our new Dental Nurse, Remie.

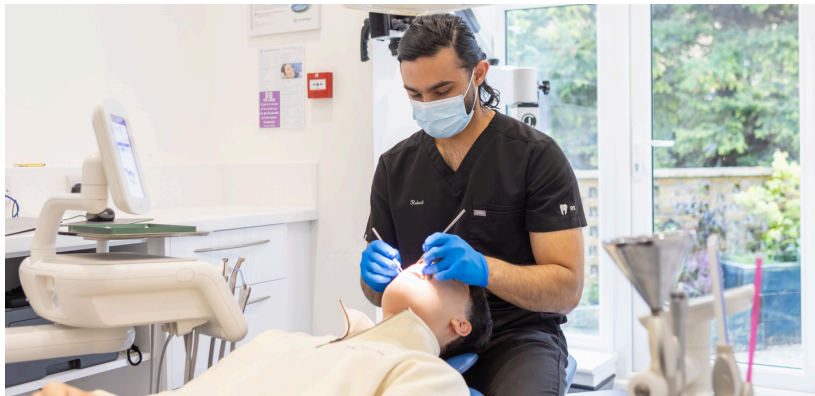

ONLINE BOOKING

We have introduced online booking for many types of appointments via our website. This service can be used for all Hygienist appointments, booking private examinations (including for Kelsey park Dental Plan patients), private emergency appointments, and consultations with our Implantologist/Oral Surgeon & Endodontist. This service is not available for booking NHS appointments, which will need to be booked directly with the frontdesk.

SURGERY 3 FULLY OPEN

Surgery 3 has now been in use for a few months after a state-of-the-art transformation offering a brand new high-end dental chair, as well as a dental microscope for more complex cases. This surgery will be used by all dentists, and will be where Endodontist appointments take place.

CAR & BIKE PARKING NOW AVAILABLE

We now have parking in front of the practice for patient use. This is reservable for those in need. Please call us to book. If there is a place, and the reserved sign is not in use, please feel free to use it while you are attending your appointment. For bike parking please ask at reception.

NHS CHARGES

**FROM
1ST APRIL**

Band 1: £27.90, which includes check-ups and urgent treatment

Band 2: £76.60, which includes fillings and root canal treatment

Band 3: £332.10, which includes dentures

OPENING HOURS & EMERGENCIES

We are open all weekdays, except bank holidays. Outside these times call 111, or for members the out of hours assistance number. We make an effort to monitor phone messages and email when we are closed, so always leave a message. You can also book private emergency appointments online.

WE NOW HAVE INHOUSE CBCT & PAN-ORAL X-RAYS

We have invested in a Vatech CBCT machine. This will be used to primarily support our Endodontist, as well as our Dental Implant work. It also offers the ability to take pan-oral xrays, which can assist in more complex cases for all of the dentists. This removes the need to refer elsewhere, and speeds up treatment times.

WIDE RANGE OF INFORMATION SHEETS AVAILABLE

These cover the following topics, and can be found in reception areas as well as on our website. You can access this via the QR code below.

- What is Composite Bonding?
- Crowns - What type of crown is right for me?
- Benefits of joining a Kelsey Park Dental plan
- Teeth Whitening - Which is best suited for me?
- What is Periodontal Disease (Gum Disease)?
- TMJ Pain explained
- Denture Advice
- Guidance on using Duraphat
- Guidance for temporary crowns and fillings
