

# *Inspired Glazing*

*Edition 1*

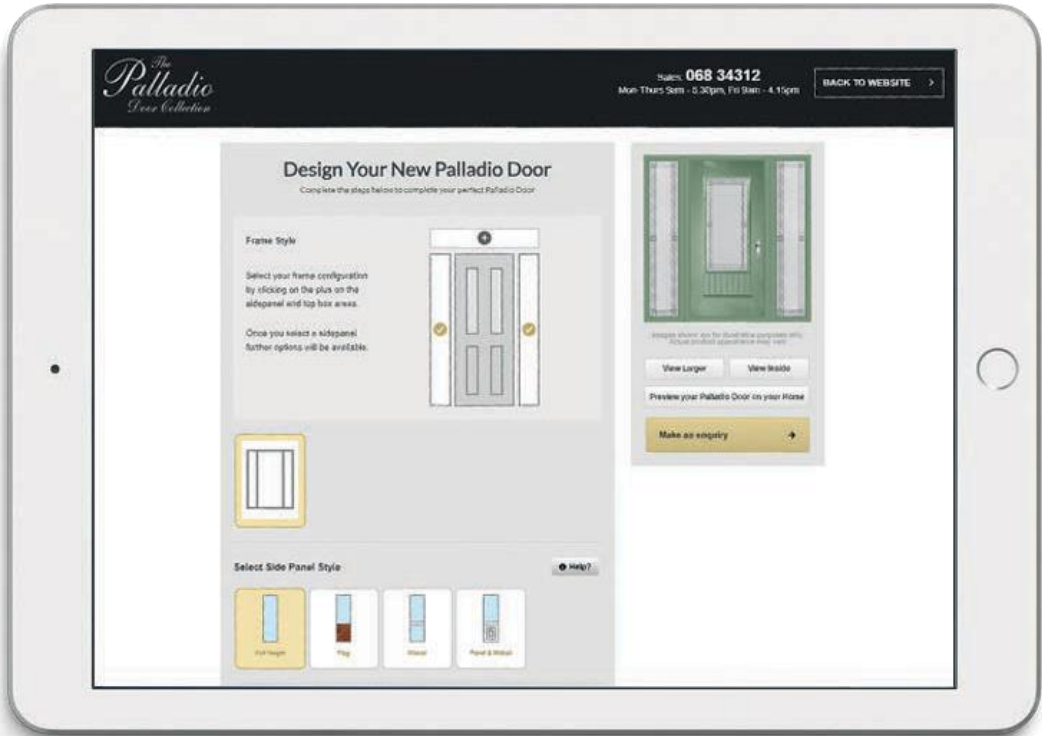

Dear Customer,

We are proud to present the Palladio Door Collection. We think you will agree that it has been worth waiting for. It is by a long measure, in our opinion, the finest composite door on the market today. In ten years research and development we have left no stone unturned in our quest for the perfect product.

Our approach to this was innovative and radical. The composition of the door differs from all others in its MONOCOQUE structure. This structure gives it a massive strength-to weight ratio and is protected in Europe by patent number 1766176 (Patents in the USA and Canada pending). Apart from the monocoque design there are a lot of other innovative features to this door. For instance, we have designed and manufactured a hinge exclusively for this door, so it is visually concealed unlike the more commonly used flag hinge, which is unsightly. Our glazing system with beads that look like wood is also very attractive. As is evident from the following pages, our wood grain finish is superb, due to the fact that all our tooling is made in house. In a very unique process we replicate exactly the finish of a real oak door, 100% true to the original. Another feature of the door is its excellent U value rating of 0.205 as tested by the “Lambda” testing method.

In addition to this, all our glass is triple glazed and we use edgetech warm edge seals for the lowest U value possible of 0.7 . Combined with our new rage of Patinated glass designs that consists of a sandblasted glass with a clear boarder that will give you modern and contemporary design, our patinated design is achieved through sandblasting not by films or resins that is completely environmentally friendly that will last a lifetime.

We are dedicated to the pursuit of excellence and service to our loyal customers. We take this opportunity to thank you for your continued support. When we say the customer is king it is not an emptyplatitude, - we mean it!

Design your new Door, Go to [www.palladiodoorcollection.com](http://www.palladiodoorcollection.com)

We have an extensive selection of furniture for our doors in various colours,  
enabling you to customise your door Our designer handles add a  
stylish and contemporary look to our doors, ensuring customer  
satisfaction.

Slendertech

600mm Curved Handle

High Security Cylinder (optional extra)  
*Superior physical strength - Cylinder design  
that prevents lock bumping Anti-snap now  
with break points allowing interior key to work*

Yale

*The Mantis 3 Lock can be used with a Lever  
Lever or Lever Pad handle, the lock consists  
of ten locking points, four roller cams, two*

#### GU Automatic Electric Lock

*The GU Automatic lock gives automatic  
security. Simply close the door, 2 latches  
automatically throw and become rigid*

#### Heritage Slam Lock

#### Heritage Slam

*An automatic 5 point locking system  
which is operated as soon*

This 3D generated photo demonstrates the advantage of our unique hinge. As is evident from the above picture, this hinge is not attached to the outside of the door, and therefore enhances the appearance of the door, unlike a more conventional flag hinge - as seen on the left. Double seal and rebate.

Here you see our superior **MONOCOQUE** structure and the advantage it holds over its competitors as demonstrated on the opposite page.

## With Your Security And Safety In Mind

Above all we are a design and innovation led company, and this will always shine through in the finished product. We start with the project design, then manufacture the machine we require and finally manufacture the product. Figure 1 shows the oak pattern from which the final mould will be produced.

The picture above shows conventional composite doors, comprised of two 2mm skins bonded to a foam core.

To dispel any lingering doubt you may have, we have carried out our own rudimentary test using a 4x4 vehicle.

Figure 2 shows finished door from the original tooling.

Figure 3 is a good example of bad tooling design that lacks character.

On the other hand, compare this to Figure 4 which you can judge for yourself.
