SEIZURE

Signs and Symptoms	Consult the person's Medical Management Plan as soon as possible if they have one.				
Any or all of the following: Altered awareness	Step 1	→	Step 2	-	Step 3
Spasm and rigid muscles Collapse	TIME THE SEIZURE if possible from start to finish		MAINTAIN THE AIRWAY	MAINTAIN PRIVACY & DIGNITY	
Jerking movements of head, arms and legs Shallow or intermittent breathing Lips or complexion may change colour Change in or loss of consciousness	PROVIDE SAFETY remove unsafe objects protect the head		roll on his/her side when jerking stops, immediately if food, vomit or fluid enters their mouth		STAY WITH THEM until seizure naturally ends and they fully recover
Noisy breathing, dribbling Faeces or urinary incontinence *Febrile convulsions are usually associated with a rapid rise in temperature in young children	REMAIN CALM reassure the person tell them where they are and that they are safe		DO NOT restrain unless in danger move unless in danger place anything in their mouth		REASSURE they will be dazed and confused or drowsy

*For further information consult Australian Resuscitation Council guidelines or your local epilepsy organisation or go to www.epilepsy.org.au
