# Stun Guns

Stun guns use high voltage and low amperage to disable an attacker for several minutes. The stun gun does not rely on pain for results. The energy stored in the gun is dumped into the attacker's muscles causing them to do a great deal of work rapidly. This rapid work cycle instantly depletes the attacker's blood sugar by converting it to lactic acid. In short, he is unable to produce energy for his muscles, and his body is unable to function properly. The stun gun also interrupts the tiny neurological impulses that control and direct voluntary muscle movement. When the attacker's neurological and muscular system is overwhelmed and controlled by the stun gun, he loses his balance. Should the attacker be touching you, the current will not pass to your body!

# Animal Repellents

The **GUARD ALASKA® BEAR SPRAY** ultra hot pepper spray has proven so effective at repelling bears, it is the only one registered with the EPA as a repellent for *all species* of bears! It is absolutely the most effective and powerful bear defense spray available. It is safe for the environment in that it does not contain flammable or ozone depleting substances.

The formula is scientifically proven superior, and it even works on wet bears because the specific gravity of the carrier is heavier than water.

Endorsed by the Alaska Science & Technology Foundation. 9 oz. Supersize. Range: 20 ft.

**BEAR PEPPER MACE® SPRAY** Great news for true outdoor enthusiasts! Now you can protect yourself against possible bear attacks with safe, humane Bear Pepper Mace® Spray. This powerful Magnum Fogger sprays up to 30 feet! Empties in approximately 5.4 seconds. 260 grams.

Upon direct contact with eyes, respiratory system and mucous membranes, the active ingredients in the pepper spray will cause eyes to slam shut, coughing, and an intense burning sensation to the skin. Effects should lessen in approximately 45 minutes.

The **SUPER DOGCHASER** uses the latest ultrasonic technology in two ways to repel a dog. One is a discomforting but not harmful high frequency sound (20,000Hz - 25,000Hz), audible to dogs but not to humans. The second is a super bright LED flashing strobe that temporarily blinds and confuses the dog. Helps stop the approach of unwanted dogs up to 40 feet. Also has a training setting. Requires one 9 volt battery (*not included*) and can *also* be used as a flashlight.
