

Happy Galentine's!!!

EndyMed 3DEEP Skin

Hello! Lot's of questions... I've got the answers.

This is a 3 Step treatment but can be done separately if desired but works best if all together. The pictures below is of a client who had the Intensif followed immediately by the FSR and then CO2 mask and red light therapy. This will give

you an idea of expectations and healing time.

Endy Tighten and Contour:

This entails a Radio Frequency hand piece that has multiple paired electrodes designed to heat up the deep dermis to 49-53C. This is where collagen stimulation begins. This is great around the eyes for bags, jaw jowels, neck laxity, and crepey décolletage. A series of 6 treatments, 1 per week for a month and then 2 more spaced two weeks apart. No numbing required, and no downtime.

\$350/ treatment \$1500 package of 6

Endy Intensif RF Microneedling:

Numbing cream sent to your home. Apply numbing cream one hour prior to your appointment time. Gold plated non-insulated needles penetrating the deep dermis to tighten and stimulate collagen.

Series is 3 Treatments one month apart. Downtime minimal, about 48 hours.

\$850/treatment \$2400 package of 3

See Pictures Below

FSR Fractional Skin Resurfacing:

Numbing cream sent to you house. Apply one hour prior to your appointment time. These are gold plated electrodes that send a current of energy into the superficial dermis to ablate the top layer of skin to take away fine lines and wrinkles, similar to a CO2 laser without the downtime.

Series of 3, one month apart. Minimal downtime, about 48 hours.

\$650/ treatment \$1700 package of 3

See Pictures Below

Full Course Treatment Areas includes:

T&C 6 treatments,

Intensif Microneedling 3 treatments, and

FSR 3 treatments, Total of 12 total treatments combined for best outcome.
