9MM
Litepaper

↘
Empowering DeFi
Innovation on
PulseChain

Abstract

This litepaper provides a concise summary of the 9mm project, an innovative DeFi ecosystem on PulseChain. With its key components including the Pulse OG NFT collection, Uniswap v3 integration and a NFT marketplace.

This document highlights the core features, benefits, and opportunities offered by 9mm in a concise and accessible manner.

Table of Contents:

1. Introduction
2. Pulse OG NFT Collection
3. Uniswap v3 Integration
4. NFT Marketplace
5. Game Theory & Airdrop Mechanism
6. Staking Mechanism & Fee Distribution
7. Buy & Burn Mechanism
8. Conclusion

Introduction

The 9mm project is a pioneering DeFi initiative built on PulseChain. By leveraging cutting-edge technologies and innovative concepts, 9mm aims to provide a defining experience of DeFi on PulseChain and other EVM Chains.

This litepaper offers a high-level overview of the 9mm ecosystem, emphasizing its key components and the opportunities they bring to participants.

Pulse OG NFT Collection

The Pulse OG NFT collection serves as the foundation of the 9mm ecosystem. Comprising 5555 unique NFTs, it rewards early investors in PulseChain with exclusive benefits.

Holders and Minters of Pulse OG NFTs receive an airdrop of 9mm tokens and gain a privileged position within the project.

This collection fosters engagement, incentivizes participation, and builds a strong sense of community within 9mm.

Uniswap v3 Integration

The Uniswap v3 protocol, integrated within the 9mm ecosystem, provides a decentralized exchange platform for efficient and secure token trading.

Operating on PulseChain, Uniswap v3 introduces concentrated liquidity, enabling liquidity providers to select specific price ranges for their assets. This feature enhances capital efficiency, reduces slippage, and promotes fair market conditions, creating a cutting-edge trading experience for 9mm participants, the first of its kind on Pulsechain.

Fees: 0.2% to LP, 0.1% to fee distribution mechanism.

NFT Marketplace

The 9mm NFT marketplace is a digital platform that enables the buying, selling, and trading of unique digital assets.

Artists, collectors, and enthusiasts can engage in transactions, fostering a vibrant ecosystem that values artistic expression and individual creativity.

The NFT marketplace within 9mm creates opportunities for artists to showcase their work, collectors to acquire unique assets, and participants to explore the limitless potential of non-fungible token.

Fees: 2.5% paid by the maker.

Game Theory & Airdrop Mechanism

The 9mm ecosystem implements a game theory-based airdrop mechanism, designed to incentivize participation and reward holders of the PulseOG NFT.

Through a captivating two-year-long airdrop campaign, users compete on a scoreboard based on their interactions within the ecosystem. Monthly leaderboards determine airdrop allocations, with participants earning a proportional share of 5% of the 9mm token supply every month.

This mechanism promotes sustained engagement, competition, and community building.

Staking Mechanism & Fee Distribution

9mm introduces a staking mechanism that allows users to stake their 9mm tokens and earn rewards in the form of \$PLS.

Stakers contribute to the stability and price performance of the 9mm token and receive a portion of the fees generated by all platforms.

The distribution of fees ensures equal sharing among stakers, encouraging broad participation and empowering the community. 50% of the fees generated from all protocols are shared between stakers of 9mm.

Buy & Burn Mechanism

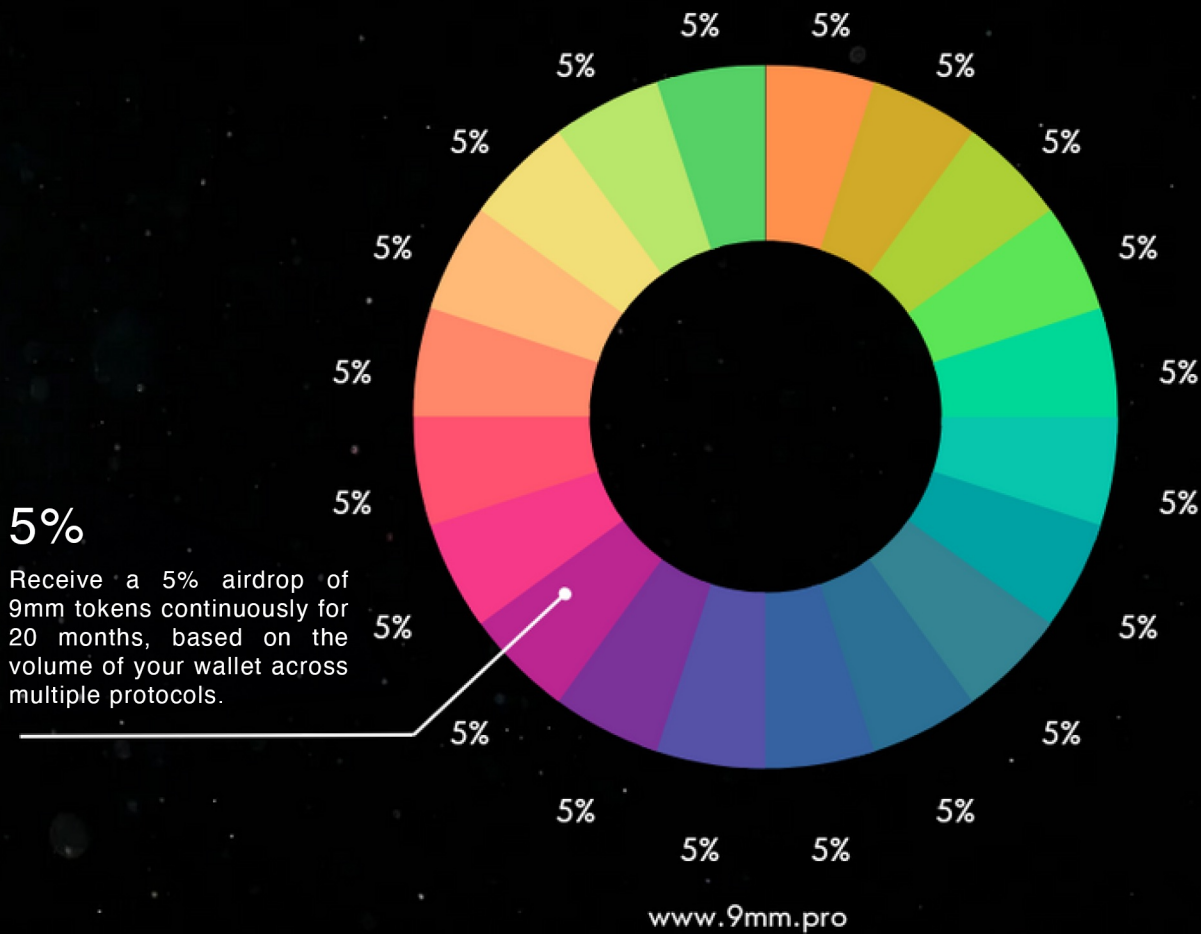

The 9mm ecosystem incorporates a Buy & Burn mechanism to enhance the value and sustainability of the 9mm token.

By utilizing 50% of the generated fees, the protocol directly purchases tokens from the market and permanently removes them from circulation.

This process aims to reduce token supply, increasing scarcity and potentially supporting the token's price over time.

Tokenomics

Conclusion

The 9mm project on PulseChain represents a new era of DeFi innovation.

Through the Pulse OG NFT collection, Uniswap v3 integration, NFT marketplace, game theory-based airdrop mechanism, staking mechanism, and Buy & Burn feature, 9mm creates a dynamic and inclusive ecosystem.

It fosters engagement, rewards participation, and promotes community building.
