

AUTOMATED CASH RECYCLER

NV4000-NXTP

Designed with the
operator in mind.

FEATURES

- Fast and accurate bank note processing with > 98% first time acceptance rate of street-grade cash
- Advanced validation enables recycling of 4 denominations, up to 70 banknotes each, with 1000-notes cashbox
- High-capacity, lockable, 400-note replenishment cassette to refill float as needed
- Modular, secure design with tool-free serviceability and field-swappable modules using visual self-diagnostics
- Remote diagnostics and updates provided for new currency releases ensures device uptime

Improve customer
experience with
accelerated
throughput

Improve
profitability
with fewer cash
collections

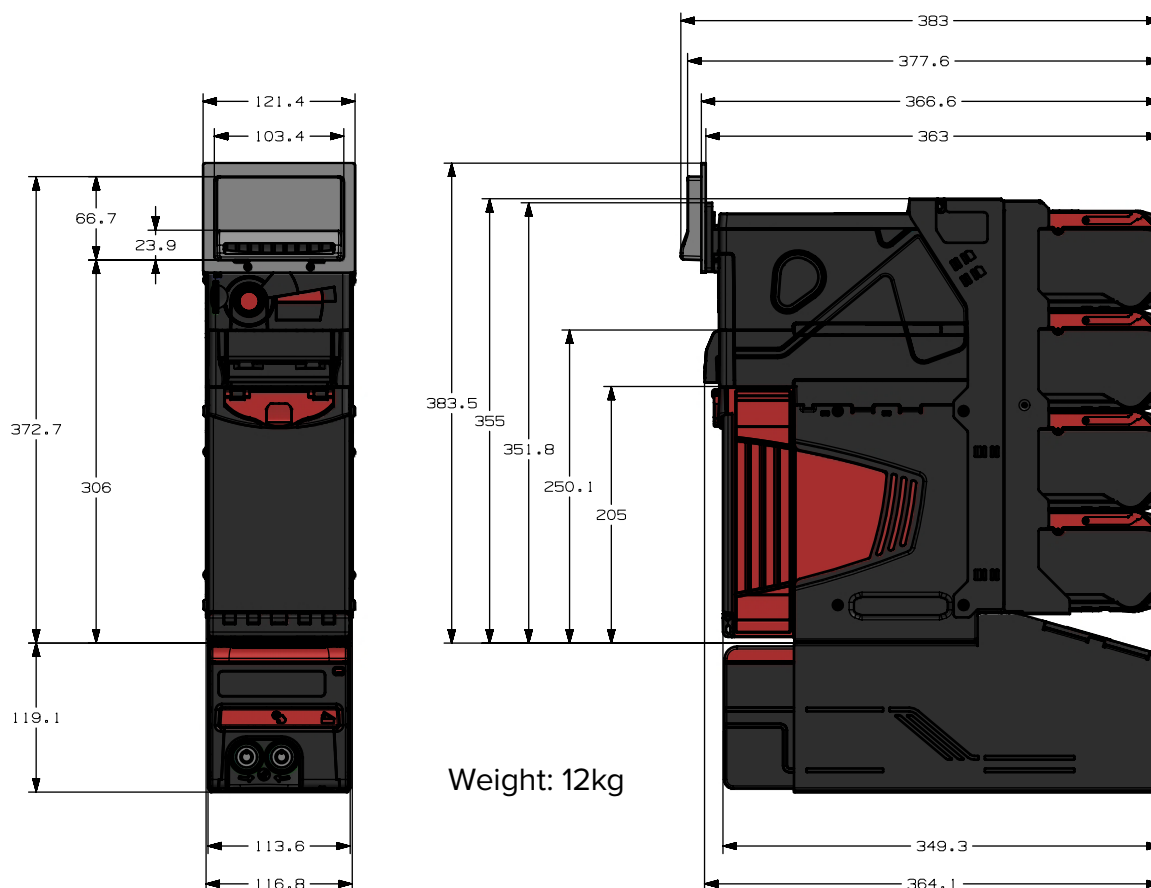

Improve efficiency
with automated,
closed-loop float
management

Significantly
reduce expensive
service calls &
machine downtime

Future proof your
cash handling
investment &
protect revenue

Technical Specification

Power

Requirements: 24V
Standby: 400mA
Running: 3A
Peak: 7A

Protocols

SSP

MCBF

150,000

Metal Bezel

85 mm width

Bill Dimensions

Accepts (W x L): 60-85 x 115-165 mm
Recycles: Width 60-82 mm
Replenishes: Width: 60-79 mm

Interfaces

USB/RS232

Certifications

UL, CE, ADA Compliant

Cashbox

1000 bills

Recycling Capacity

70 x 4 recycler modules

Replenishment Capacity

~ 400 bill replenishment cassette
