Energetic: What We Do

Energetic integrates Five service bundles:

1. Market and business development
2. Project and long-term finance
3. Commercial real estate development
4. Energy production, monitoring, and efficiency
5. Energy off-takers such as datacenters, cold storage, indoor agriculture, manufacturing, commercial real estate

This presentation will focus on Energy and Building Monitoring (Smart Buildings).

Energetic Partners with Autani

Energetic LLC has a contractual relationship with Autani to jointly deliver energy and smart building solutions. Together, we deliver customized energy solutions where, how, and when they are needed. We partner with our clients on energy assessments and energy-as-service to on-site generation, renewable and distributed/ commodity energy, and storage. What we deliver is exceptional cost savings, increased efficiency, energy security, resiliency, and of course, a greater ROI.

Autani is designed to scale easily, without having to replace equipment. Each tier adds functionality.

Keilton+Autani

Keilton+Autani is a standalone room-based lighting control solution that can be configured to different profiles, utilize daylight harvesting, and task tuned to optimize occupant comfort and energy efficiency.

Easy upgrades to next level facility management:

- Adds additional controls
- Easy upgrades from Lite
- Adaptable & scalable
- Easy to manage

Autani Insights

Autani Insights is an advanced analytics package that simplifies the process of building analytics.

Spacial Analytics

Deep Building Analytics

Desk & Conference Room Reservations

Future App & API Ready

Location & Occupancy Insights

Industry Specific App Integrations

Insights & Analysis to improve facility management:

- Key asset tracking
- Campus-wide wayfinding
- Room reservations
- 3D Facility monitoring
- Multi-site analytics and insight

Healthcare

Hospital Floor

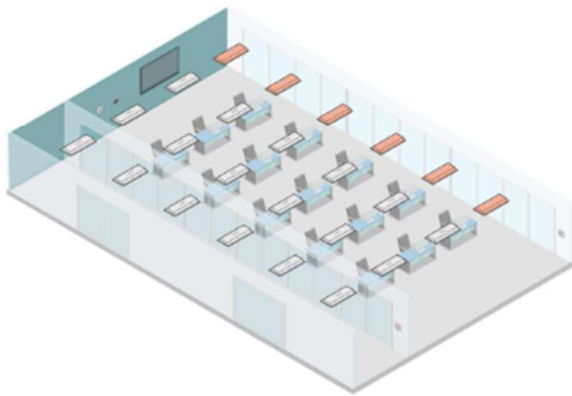

Collaborative and comfortable environment for staff well-being

Patient Room

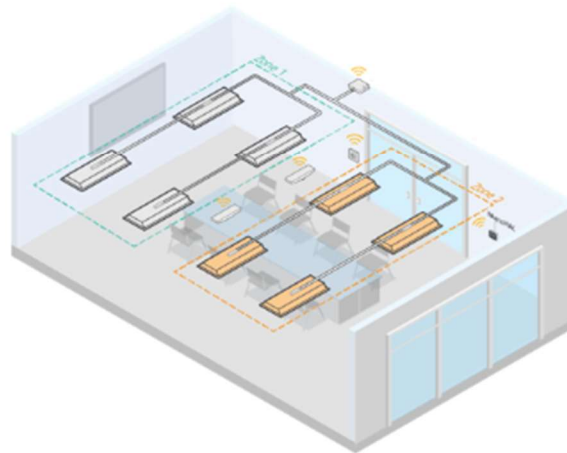

Balanced environment for patient care and recovery

Office

Open Office

Create a flexible and comfortable work space

Conference Room

Creating a flexible and collaborative meeting space

Education

K-12 Classroom

Connected, comfortable, and flexible learning environment to stimulate learning

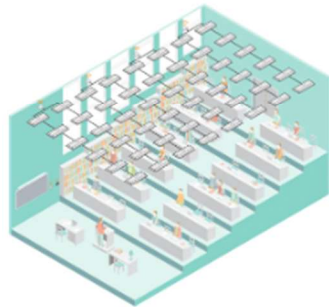

University Campus

Connected and scalable multi-site management

University Dorm

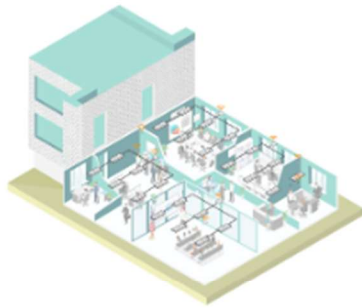

Safe, comfortable, and manageable living environment

University Auditorium

Dynamic, comfortable, and flexible learning environment to exchange ideas

insights

Big Box

Improved customer
experience and building
management

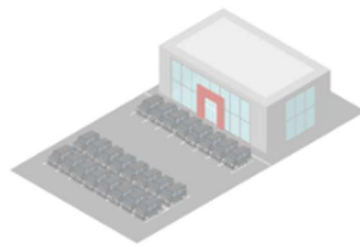

Hospitality

Hotel Room

Occupancy driven comfort
and cost effective guest
rooms

Outdoor

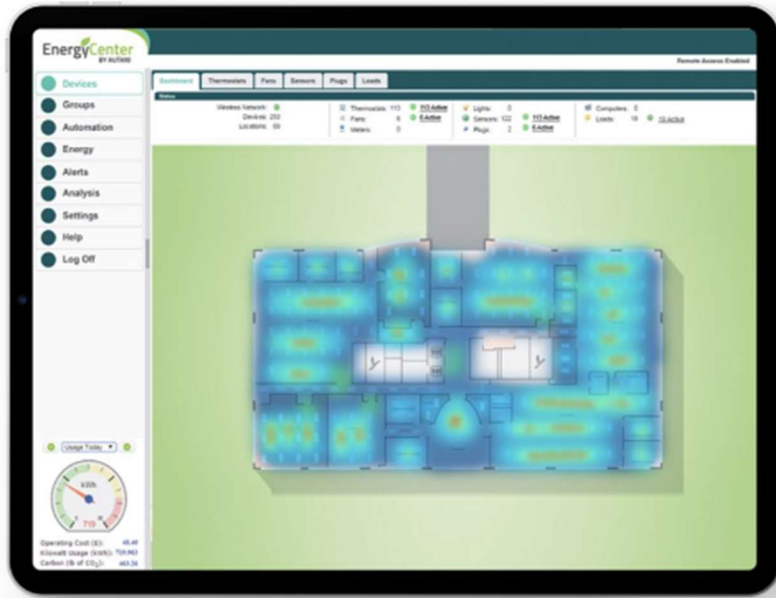

Outdoor

Safe, reliable, and
economically viable lighting

Autani saves you money

Autani's building control systems and energy management solutions automatically save you money year-over-year. Our building controls blend with existing technologies to create efficiencies that allow the systems to pay for themselves quickly and easily.

Autani unlocks insights

Autani's management software goes far beyond standard cost savings. It can unlock insights into your customer behaviors, space utilization and optimization, as well as create comfort engineered spaces that are in tune with the needs of the building users.

Autani saves costs on installation

Autani systems are wireless, which means that installation is simple and efficient compared to wired solutions. The Autani Commissioning application dramatically reduces commissioning time for large-scale projects.
