

LASH ENHANCEMENT AFTERCARE

Wash your eyelids before bed with lukewarm water and a cotton round. Pat them gently, do not rub.

Do not fully submerge (in bathtub, pool, or bodies of water), do not use soap/cleanser, and do not touch your eyes for the first 7 days after your procedure.

Do not pick, remove, or pull at any dry scabs. If it starts to flake, leave it alone.

Do not wear contact lenses until eyelids are done scabbing and scabs have come off.

Do not use eye makeup (eyeliner, eyeshadow, mascara, etc.) or lash serums for the first 7 days after your procedure.

Avoid tanning or direct UV light for 4-6 weeks after your procedure.

Additional notes:

It may take around 6-8 weeks to see the final results.

The aftercare instructions are geared toward minimizing risk of infection and aiding in pigment retention.

It is ultimately up to you to follow these instructions in order to heal your fresh PMU properly.

Please contact the studio if you have any questions or concerns.
