HOW DO HVF ENERGIZERS WORK?

High Vibrational
Frequency
Aromatic Particles

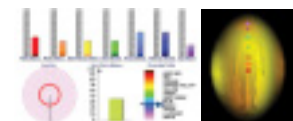

Studies have revealed evidence of a connection between the immune system and the olfactory system – used for sense of smell. When the high vibrational particles of HVF Energizers penetrate into our olfactory system (bodily structures that serve the sense of smell), they affect the limbic system, (linked to the emotions, the heart rate, blood pressure, breathing, memory, stress, and hormone balance) to uplift our energetic and immune systems.
