

NEXTGEN FRAUD DETECTION

XPECTRO
SOLUTIONS

STOP COMMUNICATION FRAUD.

Enterprise grade detection for smishing, vishing, phishing and deepfake voice fraud.

ABOUT US

Xpectro Solutions is an **ISO/IEC 27001:2022** certified, product based company. We specialize in ML/AI driven, human-centric fraud detection.

Our flagship product, **ePayCop**, delivers real-time, transparent protection against nextgen frauds such as smishing, quishing, vishing, and phishing through links, images and files. Integrated within its ecosystem, ePhishhook acts as a proactive shield with a published patent, instantly alerting users to malicious attempts. Beyond our own products, we also provide software consultancy for Big Data engineering, analytics and system integration.

VISION

Our vision is to develop smart, innovative, and high-quality software solutions that address common societal challenges through cutting-edge technology and diverse perspectives.

MISSION

To build trust and empower commerce by real-time detection of modern age, multi-dimensional frauds like smishing, phishing, vishing and fake voice calls.

TYPES OF FRAUD

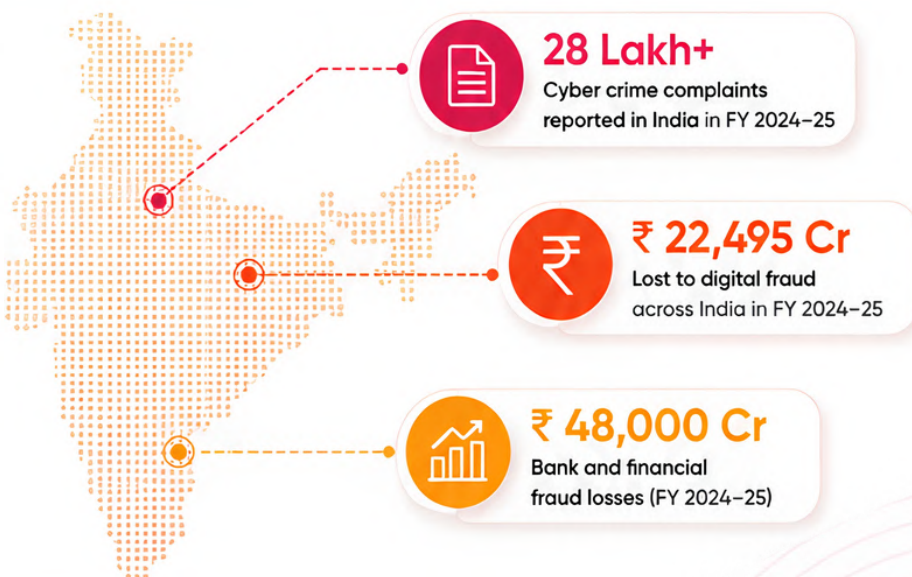

Digital fraud in India is no longer a side issue, it is now a board level risk. Criminals are moving faster than the systems meant to stop them, and they are increasingly using AI to do it.

FRONTS WHERE ENTERPRISES ARE LOSING TODAY

THE COST OF MODERN FRAUD IN INDIA

No one company or solution is focusing on **all six modern fraud vectors**.

THE XPECTRO ADVANTAGE

Most organizations stitch together five different point solutions to cover fraud across SMS, calls, links, QR codes and files. Xpectro replaces that patchwork with one engine.

Zero Trust, Privacy First

End-to-end encryption with no access to sensitive user data.

API First, Fast to Deploy

Restful APIs, minimal integration effort, go live in days.

Transparency & Accuracy

Transparent decisions with reasons, confidence scores and audit trails.

One Platform, Every Channel

Call, Voice, SMS, QR and payment channels on one unified platform.

Scalable & Future Ready

Cloud-native architecture to scale with your growing needs.

Dedicated Support & Success Team

Expert onboarding, continuous support and success partnership.

TRUSTED & RECOGNIZED BY

Empowering Startups.
Building Ecosystems.

Innovation • Development • Communication

ePayCop SAAS PLATFORM

AI-powered, multimodal fraud detection across SMS, calls, links, QR codes, images, files and voice audio-protecting enterprises and their users in real time.

One API. Complete Visibility

Scan every channel with a single robust API.

Real-Time Protection

Detect and block threats before they reach your users.

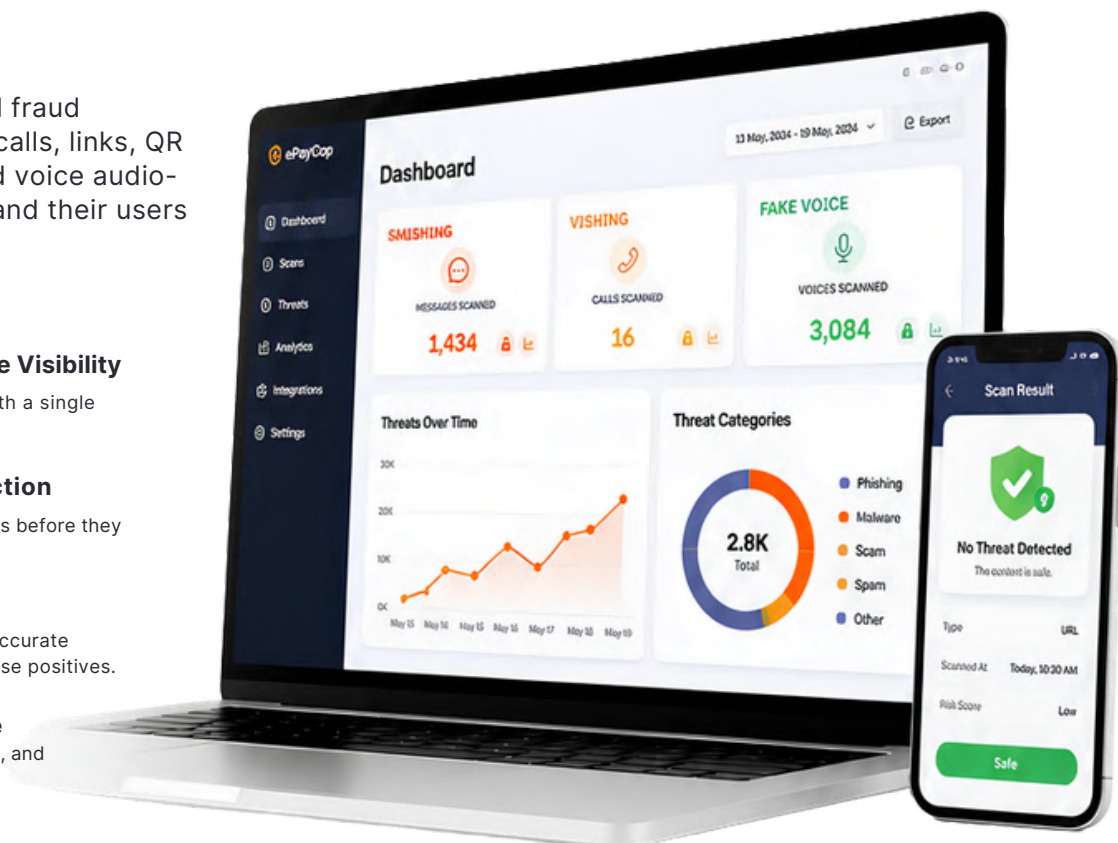

AI/ML Powered

Advanced models for accurate detection and fewer false positives.

Enterprise Secure

Privacy-first, encrypted, and compliant by design.

HOW EPAYCOP WORKS

01

Capture

Collects content from SMS, calls, links, URLs, files, images, QR codes and voice audio.

02

Analyze

AI/ML engine scans and analyzes using advanced fraud detection models.

03

Classify

Content is classified as Safe, Suspicious or Malicious.

04

Protect

Threats are blocked in real-time and actionable alerts are sent to keep users and data secure.

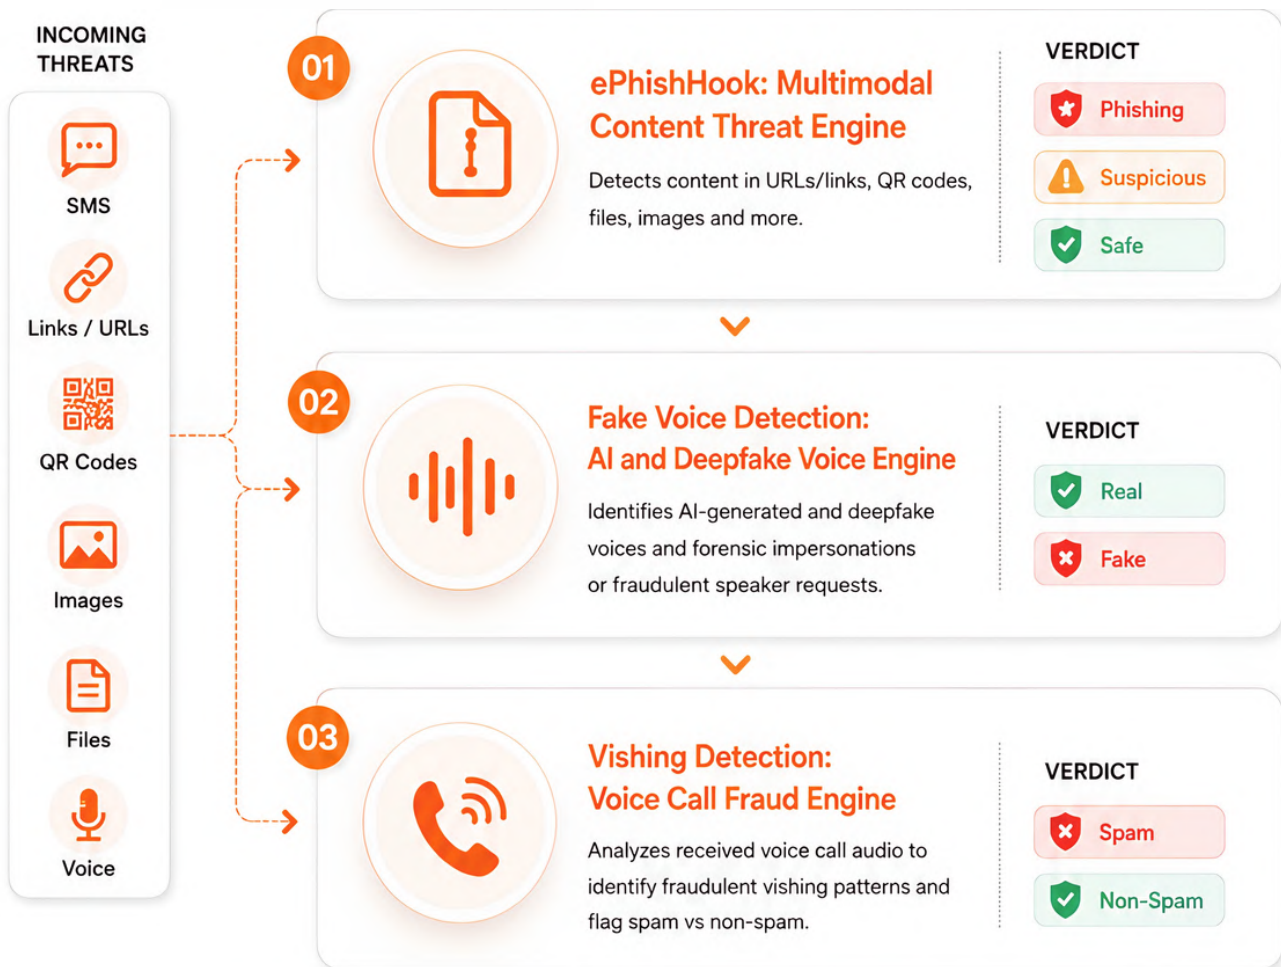

Experience NextGen Fraud Protection

Secure every interaction. Protect every user.

THE 3 CORE DETECTION CATEGORIES

The ePayCop API routes every request to one of three purpose-built detection engines. Each engine returns a clear, machine readable verdict that plugs directly into your existing fraud workflow.

One API. Three Intelligent Engines.
Complete Protection For Your Business.
Plug into ePayCop and stay ahead of every fraud threat.

WHAT USERS ARE SAYING

“ ★★★★★

I really appreciate that ePayCop is extremely lightweight and provides real-time results. The performance is consistently reliable, ensuring fraudulent calls are flagged in time. It quickly processes information without compromising on quality or speed.

Anjali Mehra
User

“ ★★★★★

This is a very helpful application for detecting spam and suspicious activity. It immediately identifies and filters unwanted or potentially harmful numbers and maintains a secure communication environment. All my sensitive conversations are being treated and displayed securely any issues.

Prakash Soni
User

“ ★★★★★

ePayCop has become an essential part of our daily communication. Its advanced detection and user-friendly interface give us the confidence that our channel is safe from fraud and misuse. Highly recommended for businesses and individuals alike.
