

## 2003-2007 Hummer H2 Door Panel Pocket Delete Set

### What's Included

- (2 x Rear Door Steel Panels) and/or (2 x Front Door Steel Panels)
- Pre-installed 3M Adhesive Tape

### Installation Instructions

1. Verify that the panel mounting surface is flat (free of the pocket and pocket support). This may require the pocket or pocket support to be removed by tool.

2. Verify that the mounting surface is clean and dry to ensure proper adhesion of the 3M tape.
3. Using a small blade, carefully remove the red vinyl protective film from the 3M tape pre-installed on the back of the panel. Refrain from touching the adhesive directly. Do not leave the panel unmounted without the red vinyl protective film for extended periods of time.
4. Securing the panel around the side, position the panel over the mounting surface and slowly apply the panel to the door. Once positioned, press firmly on the panel to ensure the 3M tape makes full contact to the mounting surface.
5. Verify that the panel is completely secured to the mounting surface by verifying that it is not loose and/or misaligned.
