### SOLAR PANELS FOR THE VILLAGE HALL

The Village Hall Committee has a responsibility to maintain the village hall to a high standard. The cost of maintenance has risen in the last few years, especially the energy costs. In the last few weeks we have applied for, and been successful in obtaining, grant funding to install solar panels on the roof. The grant of £5000.00 is from the Government's Shared Prosperity Fund Decarbonisation Projection and, with the addition of some funding from the village hall's own account, this has enabled us to go ahead with the installation of solar panels in mid February.

The roof insulation in the hall is below the current minimum requirement and so we are planning to increase the depth of insulation shortly. Our County Councillor, John Ogle, has very kindly awarded the village hall £200.00 from his Divisional Fund to assist with the funding of this and our Parish Council has agreed to match fund the estimated cost with a donation of £1000.00.

So users of the hall will soon be toasty warm!! "

### ANYONE INTERESTED IN CARD GAMES?
