

Maple Hill Creek Berry Farm

Jams & Jellies

Our berries are 100 % organically grown; no chemical fertilizers, no herbicides, and no pesticides are used. Berries are produced on non-GMO vines and shrubs that have been specially selected and purchased locally or naturally propagated.*

Our jams and jellies are made using Morena non-GMO, all natural, certified clean, pure cane sugar. To ensure the best fruit flavors, the process uses

Our jams & jellies are prepared, processed, and packaged completely by hand.

the whole fruit, so the presence of a few very tiny seeds is possible, but rarely noticeable.

Our jellies include the additional ingredient of Sure-Gel premium

fruit pectin. You will notice that our jellies may be darker or cloudier than other jellies. This is the result of our fruit juice being filtered only twice, preserving much of the pulp and natural pectin, unlike most commercially produced jelly, where the fruit juice is ultra-filtered with flavors added back. This helps to maintain the natural flavor of the fruit and make what we believe is a better tasting jelly—we think you will, too!

Maple Hill Creek Berry Farm—from our kitchen to your table - enjoy!

* we are not USDA certified as an organic grower
