

WellFirst Wellness Program

No appointment needed • Most patients are seen and released within 30 minutes

What is the WellFirst Wellness Program?

An annual contract between the healthcare provider, WellFirst Urgent Care & Family Practice and the member(s). Membership is based on individual or family coverage with a set monthly fee, deducted monthly from either debit, credit or checking account. (Minimum of 12-month contract required.)

This is *NOT* a medical insurance policy, nor is it designed to replace medical insurance coverage, but rather a membership program entitling WellFirst Wellness Program members certain medical and preventive care services within a preset budgeted amount. This program covers services within the scope and capabilities of WellFirst Urgent Care & Family Practice, not to include third party care.

Healthcare services including but not limited to:

- Minor illnesses
- Sore throat
- Sinus infections
- Colds
- Respiratory Illness
- Influenza
- Stomach infections
- Rashes and skin infections
- Viral infections

Antibiotics and non-inflammatory injections are included, if medically necessary. In-house laboratory testing is included; however, any laboratory testing requiring a third-party provider will be the responsibility of the member but is eligible for a substantial pricing discount.

Sports And School Physicals

Schools and athletic organizations require several physical exams and preventative measures to make sure participation is safe and healthy for all involved.

Chronic Disease Management

Management programs for diabetes, heart disease, asthma, arthritis, hypertension, and many other chronic conditions. In the event your condition changes and requires more specialized care, we will refer you to an appropriate specialist healthcare provider. Third party care provider will be the responsibility of member.
