

To whom it may concern,

The intention of this letter is to introduce you to our company Perdomo National Wrecking of NY for all your demolition needs. Perdomo is a nationwide full-service Demolition, Abatement & Earthwork contractor. Our headquarters are based in Manhattan at the heart of NYC, and Washington D.C. Annually, Perdomo demolishes a minimum of 5 million square feet, and upwards 20 million square feet nationwide depending on the scope of our projects at any given time.

This gives us an edge over the competition from an experience and price standpoint due to such extensive volume. We employ a skilled workforce of over 800 employees throughout the East Coast, and over 200 pieces of owned heavy equipment which enables Perdomo to execute its contracts without depending on rental companies, and outside vendors. This allows us reduce cost, and keep on target with our timelines.

Perdomo has an extensive network of buyers for the resale of building components, and its own in-house salvage division which provides the best outcome for our clients on price as well as keeping up with the LEED requirements most projects have. On average, Perdomo recycles over 90% of all debris coming from its projects and 100% of metals.

Our past, and current performance includes, but is not limited to, Power-plants, waste water treatment plants, schools, hospitals, Military bases, shopping malls, high rise office buildings, old factories, and major industrial facilities. Perdomo NY maintains the highest standards, and has won the Keystone Contractors award several years in a row for the top category of 100,000-man hours or more without a single accident. Here at Perdomo we maintain a bonding capacity of over \$150 million with a single project limit of \$75 million.

Thank you for your time and consideration for future projects. We look forward to providing competitive pricing, and superior services to you in the near future.
