“Janet brings a powerful blend of confidence, professionalism, and deep expertise in risk management to consistently deliver innovation and first-of-its-kind business solutions. Her strategic insight, strong leadership, and steadfast support for both her team members and stakeholders make her an invaluable asset to any organization”.

Suezann Bohner
Construction Safety Manager
Denver International Airport

“Janet is an A++++ player who knows how to deliver results. From concept to completion she is a terrific leader. Janet is detail oriented and is the consummate team player”.

Ed White
Founder and Managing Partner
Business Aviation Solutions

“The marketing industry is unmatched in the demands and pressures it places upon those who participate. As a leader, Janet has been front and center in key situations and decisions her department faced. She never failed to arrive at the right solution, nor to make the right recommendation to others on the leadership team – even when those decisions might not have represented the easiest of paths”.

Principal
Grace Dickerson
A Marketing Consultancy

SELECT CAREER HIGHLIGHTS

PROGRAM MANAGEMENT

Led the team at Denver International Airport managing multiple Rolling Owner Controlled Insurance Programs insuring over \$4B in construction projects; established key performance metrics centered on safety, small business growth, and cost avoidance and further expanded the focus on safety through added staff, dashboards and training initiatives to ensure program success.

STRATEGIC PLANNING

Catalyst and project lead for a Climate Resiliency Assessment and Adaptation Plan effort at Denver International Airport (DEN) (aka Project Darwin) analyzing climate stressors on critical assets and operations to be able to answer the question ‘For DEN, what are our largest risks from projected climate change and what can we do about it?’ This project delivered a well-researched vulnerability assessment and adaptation plan that prioritized areas of focus for the present and out to 2045.

INSURANCE PROGRAM INNOVATION

From concept-to design-to execution, established a unique insurance program providing Excess Auto Liability at Denver International Airport to make it easier for companies to obtain the required \$10M limit to drive unescorted airside. This program reduces barriers for small business by offering coverage estimated to save 70% on insurance premiums and is structured to be a net zero cost to the airport.

PROJECT MANAGEMENT

Spearheaded acquisition integration of two former competing insurance brokerages into a single collaborative, multi-location entity. Focusing on areas of Compensation and Rewards, Licensing and Contracts, Marketing (internal and external), Procedures and Forms, Talent Management and Technology. Initial outcomes resulted in staff engagement, office consistencies and collaborative strategies for continued growth.

SYSTEM AND PROCESS IMPROVEMENT

Transitioned a manually administered \$30M Workers’ Compensation program to a computer-based system including initial research/design and overall project management; resulted in enhanced profitability by reducing the required administrative labor by 75% as well as added security of information.

RECOGNITION

Received the 2024 Risk Management Professional of the Year award from Airports Council International - North America recognizing the innovation and achievements of the Risk Management and Construction Safety team at Denver International Airport.
