CABLE TRAYS

Metal Tech Cable trays are designed to meet most requirements of cable and electrical installation with compliance to local and international standards of fabrications.

Metal Tech Cable trays are made from Perforated Metal Sheets which has been later Hot Dip Galvanized for Longevity.

Metal Tech produces:

Straight run Cable Trays

Tee Sections

Elbow Sections

Reducer Sections.

Materials Used

1.50mm Mild Steel Hot Dip Galvanized *

Perforation Dimensions**

Perforation Sizes : 7mm WX 32mm L

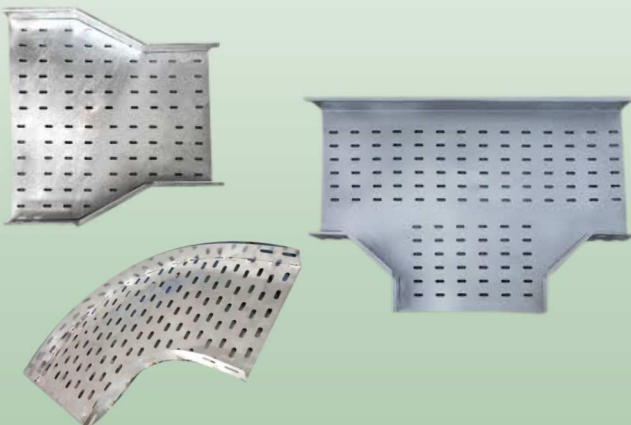

Hole pitch : 25mm

Process:

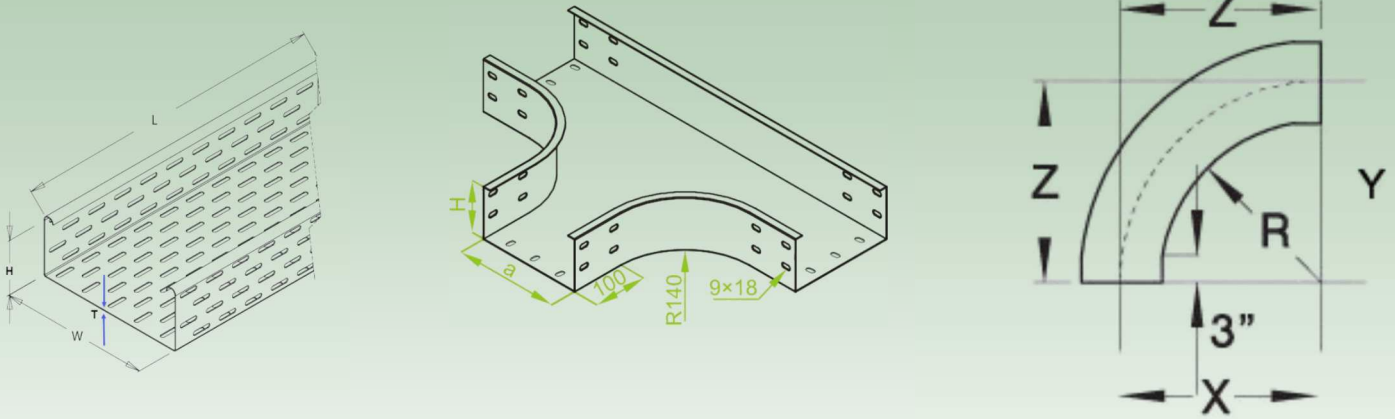

Mild steel sheets perforated with Turrent Punching System further Fabricated with associated Shearing and press brakes to achieve the required dimensions. This is further Hot Dip Galvanized to reach final product finish.

* Different Thickness are available on request

** Different Pattern perforation available on request
