

2026 Building Project Approval Statement

To Whom It May Concern:

This letter confirms that, for the calendar year 2026, the Wood Creek Homeowners Association does not maintain a building committee nor require a formal approval process for exterior property projects. Homeowners may proceed with projects—including, but not limited to, the following examples—provided all work is properly permitted in accordance with applicable state and local ordinances and regulations:

- Installation of pools
- Installation of fences
- Installation of sheds
- Exterior paint or siding
- Additions to residential structures

No separate HOA approval is necessary for these types of projects. Please ensure compliance with all governmental permitting and inspection procedures. This letter may be submitted as proof of HOA policy for the year 2026.

If you have any questions or require further clarification, please contact the Wood Creek Homeowners Association.

Sincerely,

Board of Directors
Wood Creek Homeowners Association
