

What is AMERICA FIRST?

AF believes that America is the freest, greatest country God has ever created on earth.

AF believes that by putting American citizens and workers first, it makes America stronger, makes the world better, and is the best action we can take for ourselves, and our allies in the world.

AF believes that there are two sexes, men and women, and they form the basis of the greatest unit to guide us forward in liberty, the family. At the same time, we maintain a strong belief in freedom with open minds, believing adults can choose how to live.

AF believes in Life.

AF believes that separating us by race is wrong, there is only one race, the human race. AF believes teaching otherwise, and grooming children is criminal.

AF believes that God is good, and teaching right and wrong is necessary for a stable society, but that freedom also allows you to choose what religion you may practice.

AF believes in the Constitution, The Bill of Rights, as the ‘God Given Rights’ that form the basis of our government.

AF believes in the independence of the individual, and that strong self-determination and American exceptionalism has created America’s greatness.

AF believes that self-determination includes universal school choice with the portability of school tax dollars, so that parents can choose the best path for our most valued commodity, our children.

AF believes that monopolistic media and Big Tech censoring and cancelling our freedoms hinders our self-determination and is criminal.

AF loves that America is the most diverse country in the world, but understands that this was, and should be done by legal immigration. Protecting America includes impenetrable borders, America choosing who immigrates, election integrity with legal citizens casting a single legal ID proven vote, and international policies that protect America’s sovereignty.

AF believes that to remain strong we need to be energy independent, and by being energy independent, we are creating the environmentally safest and cleanest world.

AF believes America is good for the world, and is proud of its history, its heritage, and its flag.

AF believes that while no country is perfect, with American spirit, ingenuity, and exceptionalism, we have positioned ourselves to conquer our failures of the past, and have best prepared us for the future. It makes us proud to continue to improve that “Shining City on a Hill.”

If the above makes AF far right winged, then isn’t it odd that we travel in such large circles!?

Richard Raszewski MD

Richard Raszewski
Vice Chairman
Pleasant Hills Republican Committee
