THIS MONTH

Planting Season is coming!

Mark your calendars—planting season kicks off in November! The key to successful planting is *RESEARCH*. Check out texastreeplanting.tamu.edu for expert information on descriptions, pictures, and insights into what your tree will look like at full size.

ONCE YOU'VE PICKED THE PERFECT TREE, ED CAN HELP YOU LOCATE AND PLANT IT. HE PARTNERS WITH LOCAL GROWERS LIKE U.S. TREES AND SPRING GARDENS ON GOSLING, WHO WILL GROW, DELIVER, AND PLANT YOUR TREE FOR YOU.

QUICK TIPS

Pruning: Look up! Keep an eye out for hangers and browning limbs.

Planting: Research your tree, pick the perfect spot, and let Ed handle the rest!

Fertilization: Now's the time to nourish those roots!

"A good tree in a good location can be an asset for years, decades, and maybe centuries. A good tree in a bad location? That's a financial liability."

REMINDER 1

Fall is fantastic for fertilizing! Trees are working hard to recover from the summer, so give them a little boost. Ed can create the perfect fertilization program to keep your trees happy and healthy.

STUMP THE ARBORIST

Q: I want a tree but don't know what I want or how to care for it. What do I do?

A: Easy.

<https://texastreeplanting.tamu.edu/>

Take the quiz to find the right tree for the right space for you. I can handle the rest!

TREE SPOTLIGHT

A southern classic. The Magnolia Tree. Beautiful, fragrant, and massive. Like Texas.
