Mixing Medications

Now that cold weather is upon us, with it comes the flu and cold season. Most of you will likely be getting over the counter medicine to help treat your symptoms. Here are some reminders and tips on taking flu/cold medicines with your regular prescription medications.

- If you take prescription medications, you have to be sure that the medicines are compatible.
- Remember, even if it's the same over the counter medicine that you have taken before, it could now cause problems if you have recently changed or started taking a new prescription medication.
- If you have any questions or concerns, please check with the pharmacist or your doctor to be on the safe side.
- Sever reactions can occur if you mix medications that are not compatible. Please know the signs and symptoms of reactions.
- Call your doctor or 911 immediately if any type of reaction occurs.
- Make sure to always read the labels on both your prescription medications and cold/flu medicines. It doesn't take much time to check and be safe.
- Check all of your medications to make sure that they are not outdated. If so, you can take them to the Village Hall or CVS for proper disposal.
