

Genealogy & Kids

DO

Allow kids to look at family photos and documents

Take younger kids with you on cemetery and ancestral lands excursions

Take older kids with you to the archives and courthouses

Let them take photos on your excursions

Encourage them to draw or write about their experiences

DON'T

Be quiet as you travel. Silence doesn't stimulate interest

Let them sit in the car. Encourage them to roam around

Keep family secrets. Share the good, bad & the ugly

Be the only expert. Let the kids speak

Don't force them. Let them fall in love in with genealogy on their own
