One Year Health Guarantee from the date of birth of your puppy:

Our puppies are examined by a licensed veterinarian at or before nine weeks of age. Your puppy will have the first set of vaccines and de-worming medicine administered. This ensures at the time of sale your puppy is healthy and free of communicable diseases. The guarantee is only for life-threatening inherited congenital diseases of your puppy/dog, and does not cover neglect, abuse, accidental death or injuries that your dog may sustain after the date of sale. You are responsible for your veterinary appointments in keeping the puppy/dog vaccinations, deworming, flea and tick control up to date. If the unfortunate occurrence happens, you must have licensed veterinarian exam and provide the necessary paperwork to prove it, within seven days of diagnosis. We will then submit your paperwork to our veterinarian to verify. Your puppy/dog must have microchip in place and verified scan at time of diagnosis, in order to identify this puppy is the one we sold you. The microchip is implanted at the first veterinarian visit in which we take the litter of puppies at or before nine weeks of age. We will not cover any vet expense and any other expenses.

We will not provide payment refund of puppy.

We will only provide a puppy in replacement (understanding it's not actually replacing the loss of your pet emotionally speaking). Replacement dog is shipped, if needed, at buyer's expense. Replacement puppy will NOT come with a health guarantee. You cannot transfer the health guarantee to a new owner of your puppy/dog. If, at any time, your unable to care for your puppy/dog, please contact us. We would like to take puppy/dog back and find a suitable home or care for it.
