EXPERIENCE

I trained and worked in classic portraiture for the first 15 years of my art career (2000-2015). Having enjoyed those years immensely, I wanted to push myself to explore non-traditional painting grounds/ tools/substrates and moved myself forward into abstraction. Every day in the studio I appreciate being able to utilize my fundamental knowledge of composition, value, drawing and colour that I acquired through representational work. I continue to thoroughly test and explore many new materials, compositions, tools and surfaces to bring my contemporary creations to life.
