

Bicycle LED GPS Tracker

Model: LCE20(2G) / LCE20(4G)

When riding a bike, quite often we have to raise our hands to notify people or cars nearby for our purposes like turning left, turning right. And to protect our loved bikes or track our wonderful trips, we have to carry an obvious GPS tracker. At present, we have LCE20 as a Bicycle LED GPS tracker with a smart Bluetooth Controller for LED status, which could give riders an excellent experience and safety, and amazing tour GPS track reports as a hidden bike accessory.
