

4G ID Card Portable GPS Tracker

Model: LCP10

LCP10 4G ID Card Portable GPS Tracker was designed for everyone who performs activity mainly outdoor without a closed or directing supervisor. It is a personal tracker worthy of buying and daily usage. especially for school kids, alone seniors, healthcare, maintenance, social and lone workers, or employees working out of standard working hours. The device acts as a solution to track and collect data on users' actions over the activity period. Up to 1200mAh battery, high-quality two-way communication for calls and emergencies, 3 programmable buttons, intelligent movement detection and reports, RFID(Optional) assure it meets market demand.

APPLICATION SCENARIOS

School student attendance management

Too many student accidents happened every day around every corner of the world. How to manage their safety and in-time attendance is always a big issue for educational institutions and families. LCP10 helps these parties easily with RFID card built-in case, multiple GPS location reporting modes, two-way communication, 6 programmable buttons, and so on. It is not only a student's name card, but also a safeguard!

Common cellphone plays an important role for seniors' entertainment and communication, while sometimes, it is not that helpful as a senior GPS phone, which can report location and two-way communication, the most part, a name card with health status and caregiver's information, and long standby during. A one-time charge could stand up to 7 days, users no need to worry about losing connections.

Teenagers/School Kids

Solo Travelers / Explorers

If you're a solo traveler, safety is one of your top concerns, especially when heading somewhere unfamiliar. Prepare a LCP10 with you before traveling, your trip will be more guarantee and back supported. LCP10 is mini and only weights 65g, but its battery last up to 7 days(depending on working mode) and 3 SOS buttons for quick dialing and communication. With such a good company, you are not alone.

Outdoor workers on construction, train track patrol, tower monitor etc., how to keep them in touch when facing emergency events or safety issue is always a top priority. Wearing a LCP10 helps them solving problems such as: real-time location reporting for locating, two-way communications, working time monitoring and working zones tracking. It guarantees worker's connection and fast response for accidents or emergencies.
