

PSA

Manufacturer of: Stencil Rollers & Ink Rollers for Code Dating & Marking Applications

HD Ink Roller Specifications

High Density Ink Rollers:

PSA, is a manufacturer of High Density Ink Rollers. The material is firm, yet flexible, and is considered the industry standard for ink rollers. The unique cell structure of this foam enables the ink to wick to the surface of the roller faster. Providing more / darker prints per minute than most other roller materials. Additionally the cell structure allows the majority the ink to be utilized in the roller.

This roller is generally supplied inked and ready to use and may be re-inked several times.
