FIRE SERVICE CATALOG

Based on research, we have come up with a line of [Zero Resistance](#) PPE. That means it is the most comfortable, ergonomically correct and innovative PPE to make life easier and safer for firefighters. From turnout gear that has eliminated throat straps, to SCBAs that adjust and expand when you move, to face masks that have built in communications so that you can talk normally even when you are on air and including decontamination cleaning supplies to help mitigate your risk of cancer. These products have been specifically designed with the latest technology available to reduce the chance of injury or death, including heat exhaustion. We also offer the best selection of lighting equipment from cost effective to premium grade-NFPA certified.

7 Series PREMIER SCBA

The most feature packed and high performing SCBA available.

ZERO RESISTANCE CERTIFIED

Dräger

Photo luminescent covers for easy visibility in low light

Non-porous, rubber coated

shoulder and hip harness for grip & easy cleaning

One size fits all - 3 step adjustable height backplate

Torso contoured shoulder harness for maximum comfort

Rigid, self supporting hip belt handles the weight of the SCBA - Exclusive to Dräger

Digital gauge that shows how many minutes to low air

EBSS pouch available

On Rear of Pack

Fully articulating hip belt that features a positive engagement to backplate that also extends to eliminate pulling on shoulders when moving

- *Lifetime Warranty*

1. Dual directional sounders and lights when PASS activated
2. 60 second disassembly for decon
3. Ten second bottle changes

Dräger

5 SERIES (PSS 5000) - Standard backplate with fully articulating hip belt - Digital Sentinel 7000 guage, *displays actual minutes until low air alarm*, built in PASS alarm - 45/4500psi bottle with quick connect - 1 minute disassembly for decon/cleaning - 15 Year Warranty

7 SERIES (PSS 7000) - On previous page

Face mask - FPS7000 - Most optically correct vision in industry - HUD mounts in mask - Optional clip to eliminate neck strap and holds mask upright - COMs units can be added to mask anytime - Sizes are S, M, L with 3 sizes of nose cones to eliminate lens fogging in winter

Heads Up Display - Mounts in mask, cycles on/off every 30 seconds to conserve battery life and remind firefighters

Cylinder Quick Connector - Speed up and stress down! Can be installed on any air bottle in seconds, perfect for mutual aid situations

Air Bottles - 4500psi / 45min

Air Bottles - 4500 psi / 60 min

Pro Upfitters Quick Reference Catalog - 2020

SCBA COMMUNICATIONS and SERVICE

VOICE AMPLIFIER (COM 5000) - Dual speaker voice amplifier - Optional radio interface cable with ear piece to better hear radio communication shown - Can be added to mask anytime

TEAM TALK (COM 7000) - Voice amplifier with built in mask to mask communications (Team Talk) - Options to connect directly to portable radio - Qualifies for **Zero Resistance**

Universal Communication Cable - Connects voice amplifier directly to radio to eliminate noise

Drager Lapel Mic - Offers exceptional performance and can be connected directly to voice amplifier

Bluetooth Module - Enables bluetooth connection with select radios

Face Mask Fit Testing - Making sure your firefighters have the right fit on their mask is crucial to keeping them safe.

SCBA Service - Flow testing and repairs to SCBA done either in house or at your hall.

FXR Turnout Gear from FireDex

Completely customizable turnout gear that is custom measured to each firefighter

ZERO RESISTANCE CERTIFIED

OmniDex

shoulder

eliminates coat rise

Only NFPA low

collar neck

** No more neck straps!*

Active Posturing

design means

this gear fits more

TRAINING EQUIPMENT AND PROPS

TUTOR - Class B Fire Extinguisher Trainer - Remotely controlled and completely mobile - Operates with a wheeled control center that operates propane burn pan - The most realistic fire extinguisher trainer available - *Give them training they'll actually remember!*

STOVE PROP for TUTOR - Simulate a fire on top of a stove for a great practice night and when you're not using your Tutor to generate revenue for your department - Resets in seconds for the next evolution and you control when fire is extinguished

Phase 1 Flashover Simulator and Fire Behavior - Training for the worst condition in the safest way possible - Providing crucial experience that will help firefighters understand and recognize the different stages of fire development and fire behavior so they can make better choices in the field. Purchase your own stationary unit or share a mobile version among your mutual aid area.

Training - We provide training that comes to your department. The experience of this training will benefit every firefighter from the rookie to the most senior member.

Confidence Maze - Completely customizable 2' x 2' panels that can be changed in seconds - Various obstacles available including drop floors, circular openings, diagonal sections and 'stud' openings - Available in stationary unit or enclosed trailer

Pro Upfitters Quick Reference Catalog - 2020

System 64 - This a complete Class B fire training system compliant with NFPA requirements. There are a variety of props that can be purchased with the system or added later. When it comes to safe, repeatable, easy to operate training, this system will provide years of service.

Vehicle Fire Prop - Class B system is perfect for running training nights with multiple evolutions - Fires can be controlled by section of vehicle and intensity - Other props available like dumpsters and BBQs with exposure wall

BBQ Prop with Roof Exposure - Simulates a BBQ that would commonly be found under the soffits of a home. Helps firefighters understand and control the spread of fire from the BBQ to building.

Swede Survival Units - Available from a Phase 1 to Phase 5 plus complete custom design - Engineered for either Class A or Class B fires that meet all applicable NFPA standards - Can be used for complete NFPA 1401 training

MLFTU - Mobile Live-Fire Training Units - Complete NFPA 1401 testing in a mobile unit - Ventilation, high angle, fire attack above, at and below grade capable - Class B fully independent operation
