OUR VISION

*“HELPING PEOPLE
HELP THE LAND”*

PARTNERS

STATE & LOCAL

The The NRCS works in partnership with state and local conservation districts

NONPROFITS

Partnering with non-profit organizations allows the NRCS to enhance its conservation efforts, access additional resources and expertise, and engage with local communities in a more effective and collaborative manner.

FEDERAL AGENCIES

The NRCS partners with federal agencies to leverage resources, expertise, and coordination in order to achieve shared conservation goals on a larger scale.

PROGRAMS:

The NRCS administers several conservation programs, including the Environmental Qualities Incentives Program (EQIP), Conservation Stewardship Program (CSP), and Conservation Reserve Program (CRP), which provide financial assistance to landowners for implementing conservation practices.

MISSION

The NRCS's mission is to provide leadership in natural resources conservation through partnerships with landowners to help them improve and protect their land for future generations

SUPPORT BY:

PRACTICES

The NRCS promotes the adoption of conservation practices such as cover crops, crop rotation, irrigation water management, and nutrient management to help improve soil health, water quality, and wildlife habitat.
