

ZION TUNNEL SHUTTLE SERVICE

FOR THE UPCOMING 2026
MOTORCOACH RESTRICTIONS

Starting in mid-2026 oversized vehicles, including motorcoaches, will no longer be able to drive on the Zion-Mount Carmel Highway through the Zion Tunnel. Consequently, motorcoach groups will no longer be able to traverse the park from East to West. This will affect traditional tour routes, depriving your guests of experiencing the eastern section of the park and the stunning Zion-Mt. Carmel Tunnel.

Let Southwest Adventure Tours help you show this beautiful section of Zion National Park to your guests! Our fleet of local Mercedes Sprinter vans are driven by professional guides who will provide commentary and make photo stops along the route. We can meet you on either the west side or east side of the park, take your guests through the tunnel with scenic stops along the way, then meet back up with your motorcoach on the other side.

Don't redesign your tours! With three shuttle plans based on the most common routes and the ability to customize your shuttle services, let us help you continue to provide an incredible guest experience in Zion National Park.
