Pennsylvania Public School Parents Have Positive Views of State's Schools; Broadly Agree With Governor and Legislature Funding Initiatives:

Majorities of Pennsylvanian parents of public school children say they have favorable views of the state's public schools, its public charter schools, and its public virtual/online charter schools, according to SurveyUSA research conducted exclusively for Education Reform Now Advocacy.

Breaking it down: 59% have very favorable (17%) or somewhat favorable (42%) opinions of Pennsylvania public schools ; 39% have unfavorable opinions (27% somewhat, 12% very). Net Favorability, computed by subtracting unfavorable ratings from favorable, is at +20 overall, and ranges from +45 among the wealthiest parents and +44 among Democrats to a low of -4 among very conservative parents. 52% have very (17%) or somewhat (35%) favorable opinions of Pennsylvania public charter schools ; 27% have somewhat (17%) or very (10%) unfavorable opinions, for a Net Favorability of +25 overall. Black parents, at +58, give charters their highest Net Favorability; respondents in West Central PA give them their lowest score, a +7. 52% also have very (17%) or somewhat (35%) favorable opinions of Pennsylvania public virtual/online charters ; 30% have somewhat (18%) or very (12%) unfavorable opinions, yielding a Net Favorability of +22. Black and very conservative respondents rate virtual charters the highest, +47 and +44 respectively; those of Asian or other heritage (+1) and those with household incomes greater than \$150,000 annually (+2) give the lowest net scores. 49% have very (19%) or somewhat (30%) favorable opinions of school vouchers ; 24% have unfavorable opinions (15% very, 9% somewhat). Net Favorability is +25; highest, +57, among Black parents; lowest, +10, in South Central PA. Governor Josh Shapiro and Senator Bob Casey have Net Favorability ratings of +6 and +3, respectively; Joe Biden is at -21. Asked to grade the school their child attends with an A-F letter grade, the average Pennsylvanian public school parents gives their child's school a B-, with a GPA scale of 2.7 on a 4-point scale. The highest marks, a 3.1, come from those with the highest incomes; the lowest, a 2.5, from those in West Central PA. Among parents earning less than \$150,000 annually who live in one the 20 school districts of particular focus for this project – listed in the "About the Research" section of this report and shown below in the "District /

SurveyUSA next told parents that the Governor and State Legislature have significantly increased funding for public schools across the state, and asked them if they supported or opposed funding each of ten proposals. Each has support from an overwhelming majority (no less than 87%) of respondents, and strong support from a majority (no less than 51% for any of the proposals). Percentages who said they strongly support each proposal, ranked from highest to lowest: 66%: Provide free breakfast for all students. 22% somewhat support, for 88% total support. Strong support of 72% in the districts of particular focus, and of 64% in the rest of the state. Strong support is highest among very liberal parents, at 84%, and lowest among somewhat liberal parents, at 57%. 73% of women strongly support, compared to 59% of men. 66%: Increase funding for mental health counseling. 27% somewhat support; 93% combined. Strong support of 64% in focus districts, slightly higher, at 66%, outside of focus districts. Strong support is highest, at 80%, among those not registered to vote, and lowest, 56%, among those with household incomes between \$100k and \$150k. 63%: Fully fund special education programs. 29% somewhat support; 92% combined. 65% in focus districts, 62% outside of focus districts. Another significant gender gap: 71% of women and 54% of men – the lowest of any group – strongly support. 62%: More individualized attention and tutoring for students. Another 32% somewhat support, for 94% supporting in total. Strong support of 64% in focus districts, 61% elsewhere. Strong support is highest among very liberal respondents, 82%, and lowest, 52%, in Northwest PA. 62%: Increase funding for free and reduced lunch for eligible students. Another 29% somewhat support, for 91% total in support. 63% in focus districts, a functionally identical 62% elsewhere. 74% of Black parents and 73% of Latino parents strongly support, compared to 59% of both white parents and parents of Asian or other descent. Strong support is lowest, at 50%, among those with the highest household incomes. 61%: Increase access to quality public school options. 30% somewhat support, for 91% combined support. 66% strong support in focus districts, 59% elsewhere in the state. Support is higher among non-white respondents than white respondents, higher among less well-off respondents than among those with higher incomes, and particularly low in Northwest PA. 60%: Higher standards and more accountability in schools. 31% somewhat support, for a combined 91% in support. 60% strong support in both focus and non-focus districts. Strong support is highest among Black parents (72%) and those who have attended some college (68%). 54%: Raise teacher salaries. Another 33% somewhat support the proposal, 87% in all. Strong support of 61% in focused-upon districts, 51% elsewhere. Strong support is highest, at 81%, among very liberal parents. 53%: Higher pay for teachers in struggling schools to retain quality teachers where we need them the most. 34% somewhat support the proposal, for a total of 87% in support. Strong support of 64% in districts of focus, 48% in the rest of PA. Strong support is highest among Black parents and very liberal parents, both at 72%, and also high among Latinos, 66%. 51%: Hire more teachers to reduce class sizes. Another 37% somewhat support, for a total of 88% who support the proposal. Strong support of 60% in districts of focus, 48% in other school districts. Strong support is highest among very liberal respondents (69%) and nearly as high among Black (61%), Latino (65%), and Asian/Other respondents (68%), compared to 47% among white parents and a low of 42% in Northwest PA. Separately, 80% support (42% strongly, 38% somewhat) Governor Shapiro's proposal for funding for a school voucher plan; 13% oppose (10% somewhat, 3% strongly). Strong support is 48% in focus districts, 39% elsewhere. Strong support is highest among very liberal parents (57%), Black parents (54%), and among Latinos, those with the lowest household incomes, those who rent their homes, and those in urban parts of the state (each 52%).

Another proposal, to fund universal free lunch for all public school students, sees 87% supporting it (62% strongly, 25% somewhat) and 12% opposed (8% somewhat, 4% strongly). Strong support is 62% overall and in both focus and non-focus districts, and is highest among very liberal parents (81%) and Black parents (74%).

19 As you may know, Governor Shapiro has increased funding for public schools across the state. He has also proposed funding for a school voucher plan which would make scholarships available to students from middle and low income families who are zoned to attend struggling schools. Funding is allocated to parents in the form of a voucher to pay for their child's tuition for a school of their choosing, including private and religious schools.

 Based on what you know, do you support or oppose this proposal?

Lastly, which of the following statements comes closest to your view about improving the quality of schools in Pennsylvania? (order of statements rotated)
 We need to fully fund our neighborhood public schools to improve quality, not create additional school options.
 We need to invest funding in quality public school options for families so parents can choose a public school that is best for their child.
 We need to invest funding into providing access to quality school options for families regardless of whether the schools parents choose for their child are public or private.

19 As you may know, Governor Shapiro has increased funding for public schools across the state. He has also proposed funding for a school voucher plan which would make scholarships available to students from middle and low income families who are zoned to attend struggling schools. Funding is allocated to parents in the form of a voucher to pay for their child's tuition for a school of their choosing, including private and religious schools.

 Based on what you know, do you support or oppose this proposal?

As you may know, Governor Shapiro has increased funding for public schools across the state. He has also proposed funding for a school voucher plan which would make scholarships available to students from middle and low income families who are zoned to attend struggling schools. Funding is allocated to parents in the form of a voucher to pay for their child's tuition for a school of their choosing, including private and religious schools.

 Based on what you know, do you support or oppose this proposal?

21 Lastly, which of the following statements comes closest to your view about improving the quality of schools in Pennsylvania? (order of statements rotated)
 We need to fully fund our neighborhood public schools to improve quality, not create additional school options.
 We need to invest funding in quality public school options for families so parents can choose a public school that is best for their child.
 We need to invest funding into providing access to quality school options for families regardless of whether the schools parents choose for their child are public or private.

Statement of Methodology: SurveyUSA is an independent, non-partisan, apolitical research company that conducts opinion surveys for media, academic institutions, commercial clients, non-profits, governments, agencies, and elected officials. SurveyUSA opinion research is conducted using a methodology optimized for each particular project. In some cases, this means data is collected 100% by telephone; in some cases, 100% online; and in other cases, a blend of the two. For those projects that are conducted “mixed-mode” (or “multi-mode”): Respondents who have a home (landline) telephone are interviewed by phone, sometimes using live interviewers, other times using the recorded voice of a professional announcer. The youngest male is requested on approximately 30% of calls to home phones, the youngest adult is requested on approximately 70% of calls. This method of intra-household selection reduces the potential for age and gender imbalance in the unweighted sample. Re-attempts are made to busy signals, no-answers, and answering machines. Landline telephone sample is purchased from Aristotle of Washington DC. Respondents who do not use a home telephone are interviewed on an electronic device, which means, for some projects, that call-center employees hand-dial cell phones and interview respondents verbally on the respondent’s cell phone, and means, for other projects, that SurveyUSA displays the questions visually on the respondent’s phone, tablet, or other device. Sample for respondents who do not use a home telephone is purchased from Aristotle or from one of several other research companies that provide access to cell respondents. Where meaningful, SurveyUSA indicates the percentage of respondents who use a home phone and the percentage who do not, and crosstabs by this distinction. Responses are minimally weighted to U.S. Census or voter file targets for gender, age and race. Target (cell) weighting is used. On questionnaires that ask about political party identification, SurveyUSA may or may not weight to Party ID, depending on client preference. Where necessary, questions and answer choices are rotated to prevent order bias, recency, and latency effects. On some studies, certain populations are over-sampled, so that the number of unweighted respondents exceeds the number of weighted respondents. Each individual SurveyUSA release contains the date(s) on which interviews are conducted and a release date. If interviewing for a particular study is conducted in Spanish, or in any other foreign language, it will be noted on the specific release. If no notation appears, interviews are conducted in English. Where respondents are filtered, such as adults, filtered to registered voters, in turn filtered to likely voters, SurveyUSA describes the filtering on the specific release. On pre-election polls in geographies with early voting, SurveyUSA differentiates between respondents who have already voted and those who are likely to vote but have not yet done so. On research completed prior to 12/31/16, SurveyUSA assigned to each question within the instrument a theoretical margin of sampling error. Effective 01/01/17, SurveyUSA assigns to each question within the instrument a credibility interval, which better reflects the sampling uncertainties associated with gathering some percentage of respondent answers using non-probability sample. Though commonly cited in the presentation of research results, “sampling error” is only one of many types of error that may influence the outcome of an opinion research study. More practical concerns include the way in which questions are worded and ordered, the inability to contact some, the refusal of others to be interviewed, and the difficulty of translating each questionnaire into all possible languages and dialects. Non-sampling errors cannot be quantified. This statement conforms to the principles of disclosure as recommended by the National Council on Public Polls (NCPP). Questions about SurveyUSA research can be addressed to editor@surveyusa.com.
