

**Woodhaven HOA**  
**Bobcat Sighting**  
**December 8, 2025**

A resident's camera captured a bobcat on the property grounds at 7:25 pm on Monday, December 8, 2025. The large adult bobcat was running along building 16 between the golf course perimeter fence and the building.

We are alerting residents of that possibility and to keep your pets on a leash when walking them. Bobcats are generally afraid of humans and avoid them, but they could be attracted by small pets.

It is a known fact that bobcats and coyotes exist along the creek on the golf course, but they usually do not venture onto Woodhaven property and rarely during the day. Bobcats and coyotes usually hunt rabbits, rodents, birds, and squirrels between dusk and dawn. There are plenty of rodents along the creek on the golf course, but we do have a large population of wild rabbits, squirrels and birds on our property. It is possible that this is what may have attracted a bobcat onto our property grounds.

Please be observant and report any bobcat or coyote (or other potentially dangerous wildlife) sighting on the property grounds to AMGI at (phone) 214-315-4914, (text) 9725-743-7174 or (email) [suzanne@amgidallas.com](mailto:suzanne@amgidallas.com). Put "Wildlife Sighting" in the subject line.

You may also report a bobcat or coyote sighting to the below City of Dallas website and phone number, stating what you observed:
