

Woodhaven Homeowners Association

Winter Weather Preparations

The Woodhaven HOA has placed most of the pool area furniture into storage for Winter.

Freeze protection covers have been placed on all building external water spigots. If you use a building external water spigot, please disconnect the hose and replace the freeze protection covers after use.

We will continue to monitor the building water shut-off boxes and piping and add insulation and pipe wrapping where necessary.

Please follow our Woodhaven Winter Tips, which can be found posted in the mailroom or on our website, "woodhavencondostx.com" under Documents/Community Information.

We will continue to monitor the weather forecast for freeze warnings during Winter, especially hard freeze warnings. Notices will be posted in the mailroom and emailed to Owners and Leasing Residents.

As another preemptive action, the trees on the complex will be trimmed in mid-January.

It is our collective responsibility to take the necessary measures to help prevent frozen and bursting pipes and other Winter calamities.
