• WATER SHUT OFF LOCATIONS

EMERGENCY WATER SHUT-OFF INSTRUCTIONS:

The dot(s) on the map represents the water shut-off location(s) for each building. The water shut off is located in a box with a cover. The box can be found on the exterior of the building approximately 1 (one) foot above ground level.

- Most of the valves for buildings 1,2,3 and 5 are located behind AC Compressors.
- Most of the valves for the remainder of the buildings are next to the building water spigots.
- Most valve cover boxes will require a flat-head screwdriver (and pliers for a few) to open.

For EMERGENCY PURPOSES ONLY, open the box. A valve is located in the box that can be turned clockwise to shut off the water. If the valve does not turn off, call AMGI emergency number(s): 214-315-4914 or 972-743-7174 or 972-481-0464.

Arapaho Rd
