*Leg vessels up to 3mm

Gentle treatments, made even better

The Gentle series has been providing world-class treatments with proven, positive outcomes across a variety of skin concerns for over 20 years. Gentlemax Pro Plus, the latest innovation in the Gentle series, brings more energy and larger spot sizes for faster treatments, on all skin types. The GentleMax Pro Plus laser delivers short pulses of light from dual-wavelength lasers to specifically target unwanted hair or lesions without affecting the surrounding skin.

Each pulse incorporates Dynamic Cooling DCD™ to enhance patient comfort and protect the skin.

The cooling protection factor of the Dynamic Cooling Device (DCD cooling system) is over 50%² greater than air or contact cooling.

There is a reason that Gentle is the leading hair removal brand chosen by dermatologists, but that's just the beginning of what this powerful device can do!

Ask your provider if GentleMax Pro Plus treatments are right for you.

What you can expect

Fast and convenient treatment

- 1 Your healthcare provider may administer cooling to the skin before, during or after treatment for added comfort; this cooling can be adjusted to your individual needs.
- 2 The number and duration of treatments will vary depending on the condition being treated and your skin type.
- 3 Treatments are generally fast: The GentleMax Pro Plus laser is capable of treating an entire back or legs in less than 20 minutes.
- 4 After most GentleMax Pro Plus laser treatments, you will be able to resume normal activities. However, you may be advised to avoid sun exposure for at least two weeks and abrasive skin cleansers. You should always follow specific instructions from your healthcare provider.

For more information on what to expect from the GentleMax Pro Plus laser treatment, please visit our website at candelamedical.com/patient
