

VIDEO CODEC

High Efficiency Video Coding H.265

H.265 has up to 50% better data compression than H.264.
It provides more recording space. You can use a 256GB SD card as 512GB.

What is HEVC?

HEVC is the next-generation compression standard that offers several enhancements over AVC.

HEVC compression is 50% more efficient than AVC, which translates into maintaining the same video quality at half the bitrate or double the video quality at the same bitrate.
