Important Disclosures

OneAscent Investment Solutions LLC ("OneAscent") was formed in March 2017, and manages a variety of equity, income and balanced asset strategies for client accounts. OneAscent is an investment adviser registered with the United States Securities and Exchange Commission. Registration as an investment adviser does not imply any certain degree of skill or training. OneAscent's Form ADV Part 2A is available on its website, www.oneascent.com, or the SEC's website, at www.adviserinfo.sec.gov, or by contacting the firm. Please consult OneAscent's Form ADV Part 2A for information regarding account minimums and fees.

This material is intended to be educational in nature, and not as a recommendation of any particular strategy, approach, product or concept for any particular client. These materials are not intended as any form of substitute for individualized investment advice. The discussion is general in nature, and therefore not intended to recommend or endorse any asset class, security, or technical aspect of any security.

Any charts, graphs, or visual aids presented herein are intended to demonstrate concepts more fully discussed by the OneAscent investment committee, and which cannot be fully explained without the assistance of an investment committee member of OneAscent Investment Solutions. Clients should not in any way interpret these visual aids as a device with which to ascertain investment decisions or an investment approach.

Performance information for the attached strategies is calculated using model performance and is based on the portfolio allocation data since inception. The strategies have not materially changed since inception. Model performance is net of any fees on the underlying mutual funds and ETFs, management fees of any underlying model portfolios, and a maximum strategist fee of 0.25% applied annually to the entire strategy. The model performance does not include any overlay fees, brokerage fees, or commissions. Performance for periods longer than a year has been annualized. Model performance means that while actual client accounts will be managed as closely to the model as possible, the performance reported is for the targeted portfolio allocations for the strategy and not a composite of actual client accounts. Accordingly, individual client performance may vary according to various factors, including fee arrangements, withdrawals, contributions, and tax considerations, among other factors. OneAscent does not control the fee amounts charged by recommending advisers. A complete listing of all trades in the model, as well as a full description of the model/strategy are available upon request.

Performance may vary when compared to the model performance presented in other materials provided by OneAscent for a number of reasons including dates of investment, deposits and withdrawals, and the specific fees paid by the client. The strategy has not materially changed since its inception. Benchmark data is derived from a blend of up to five broad based market indices and comes from Morningstar. The blended benchmarks are rebalanced back to their target weights each calendar year. The five broad market indices are MSCI ACWI ex USA, S&P 500, Russell 2500, Bloomberg Barclays US Aggregate Bond, and the Wilshire Liquid Alternative. Indices are reported to give a point of comparison only. An investor may not invest directly in an index.

The strategies are not necessarily appropriate for any particular client or investor. Accordingly, any reader of the attached description should not interpret the attached as investment advice. All investments bear a risk of loss, including the loss of principal that the investor should be prepared to bear. The use of any chart or graph in the attached is not intended to be viewed as a singular aid in determining investment strategy. Such visual aids are instead intended as a complement to other data, and like such other data, should be considered in light of consultations with professional investment tax and legal advisors. Past performance may not be indicative of future results. No current or prospective client should assume that the future performance of any specific investment, investment strategy (including investments and/or investment strategies recommended by the adviser), will be equal to past performance levels. Indices are reported to give a point of comparison only. An investor may not invest directly in an index. Different types of investments involve varying degrees of risk, and there can be no assurance that any specific investment will either be suitable or profitable for a client's investment portfolio.
