COURSE OBJECTIVES

The objective of this educational course is to educate the user on professional ethics in the workplace. Professional ethics is one of the most important topics for a professional engineer of any discipline. The study of ethics helps to guide the behavior of an engineer whenever they come across an ethical dilemma. So, it becomes utmost important to understand how to behave ethically at the workplace. Ethical behavior goes beyond your interactions with engineers and impacts all coworkers in any workplace. For a professional engineer ethical behavior also transcends the workplace and impacts the wellbeing and safety of the public as a whole. This course will help you understand the basic concepts of ethics and how a company can establish ethical behavior and standards for its employees by building and sustaining an ethical work culture. This course combines some of the content from the following courses: T100, T101, T102.

COURSE DETAILS

This course is an interactive/video course where the user learns through video explanations as well as interactive slides and modules. If you require a timed & monitored version of this course, you can select that option before you start the course. You can take the course anytime and anywhere, on any device. This course is completely self-paced, so you can start and stop and set your own pace. If you need to take a break during the course, you will be able to pick up at the point where you left off. At the end of the interactive/video course, you will have a completion exam to ensure you learned the material which was presented. Upon scoring a 70% or above on the end exam, you will receive a completion certificate with your name, PE#, and the date on which you completed the exam. We also keep a copy of all certificates indefinitely.
