COURSE OBJECTIVES

The objective of this educational course is to educate the user on computer and workplace security. This course will provide formal security education related to security and privacy issues concerning personal devices, passwords usage, phishing attacks, suspicious URLs, social engineering, and data leakage. It will also provide some general tips for staying safe online for better workplace safety. By the end of this course learners will be able to: Understand the importance of workplace security; Identify and avoid risks; Understand the importance of physical security at the workplace; Recognize the kinds of behavior and activities that should be reported; Have knowledge of cybersecurity at the workplace; Understand what social engineering is, the techniques used, and ways to avoid it.

COURSE DETAILS

This course is an interactive/video course where the user learns through video explanations as well as interactive slides and modules. If you require a timed & monitored version of this course, you can select that option before you start the course. You can take the course anytime and anywhere, on any device. This course is completely self-paced, so you can start and stop and set your own pace. If you need to take a break during the course, you will be able to pick up at the point where you left off. At the end of the interactive/video course, you will have a completion exam to ensure you learned the material which was presented. Upon scoring a 70% or above on the end exam, you will receive a completion certificate with your name, PE#, and the date on which you completed the exam. We also keep a copy of all certificates indefinitely.
