COURSE OBJECTIVES

The objective of this educational course is to educate the user on fall protection training. Employers must proactively protect employees who have to work at heights so that incidences of falls are reduced. The first step is to provide the right type of fall protection training, which can make a difference between life and death. This course is designed for any employee who may work with ladders, scaffolding, and in environments where a fall hazard could occur. This course uses content approved by OSHA to provide employees with an awareness of fall hazards and the proper use of ladders, scaffolding, restraints, and controls to maintain a safe working environment. This course includes content from SAF-T104, SAF-T105, SAF-T106.

COURSE DETAILS

This course is an interactive/video course where the user learns through video explanations as well as interactive slides and modules. If you require a timed & monitored version of this course, you can select that option before you start the course. You can take the course anytime and anywhere, on any device. This course is completely self-paced, so you can start and stop and set your own pace. If you need to take a break during the course, you will be able to pick up at the point where you left off. At the end of the interactive/video course, you will have a completion exam to ensure you learned the material which was presented. Upon scoring a 70% or above on the end exam, you will receive a completion certificate with your name, PE#, and the date on which you completed the exam. We also keep a copy of all certificates indefinitely.
