COURSE OBJECTIVES

The objective of this educational course is to educate the user on OSHA's "Focus Four", which is the top 4 fatality-causing events in the construction industry, also known as the Focus Four Hazards. This course is designed to educate engineering working in industry about these specific hazards so they can recognize, avoid, and help eliminate them from the worksite. By the end of this course, you will be able to learn about the various hazards; identify the different types of hazards; and assess the protection systems to protect yourself from these hazards.

COURSE DETAILS

This course is an interactive/video course where the user learns through video explanations as well as interactive slides and modules. If you require a timed & monitored version of this course, you can select that option before you start the course. You can take the course anytime and anywhere, on any device. This course is completely self-paced, so you can start and stop and set your own pace. If you need to take a break during the course, you will be able to pick up at the point where you left off. At the end of the interactive/video course, you will have a completion exam to ensure you learned the material which was presented. Upon scoring a 70% or above on the end exam, you will receive a completion certificate with your name, PE#, and the date on which you completed the exam. We also keep a copy of all certificates indefinitely.
