

Retain and enhance existing desire lines along Wolfs Castle Avenue and Templeton Avenue with additional planting

Existing street trees with grass verges along  
Wolfs Castle Avenue

WOLFS CASTLE AVENUE

Existing avenue of trees could be extended to meet the trees along Wolf Castle Avenue to link both green corridors

Existing area of lawn is a low-point in the development and provides opportunity for enhancement with supplemental planting without disturbing the root protection areas of existing trees.

Development to avoid disturbance within root protection areas of retained trees. Category U trees to be removed and retained trees' lower branches pruned to create a 3m clear stem and improve visibility across the space.

Existing area of grass and specimen trees could be enhanced with compensatory tree planting if required

Existing high-value street trees in grass verges along Templeton Avenue to be retained and could form an attractive frontage to the southern edge of the development. Opportunities for grass verges to be enhanced with naturalising bulbs species. Development to avoid conflict with root protection areas (orange dashed lines).
