

# Payroll and Finance Come Together

It's time to take your payroll and financial management to the next level with the first native, fully automated integration between APS and Sage Intacct General Ledger.

## Gone are the days of spending countless hours re-entering data

The APS and Sage Intacct integration provides a scalable, seamless connection that unifies key payroll and finance data so you can be more proactive and strategic.

### What It Does

Our native, fully automated integration simplifies your bank reconciliation and expands your visibility into financial trends and metrics. Set up your workflow by integrating APS and Sage Intacct and then relax as payroll data instantly syncs to your GL. You'll wonder how you ever worked without it.

### Why You Need It

With our intuitive and flexible technology, you can:

- Reduce errors associated with manual entry.
- Promote information sharing for multiple clients, locations, or entities.
- View your payroll and finance data in APS or Sage Intacct.
- Quickly see the impact of labor expenses and HR information to promote smarter decision-making and budgeting.
- Automate data sharing to save time and unify collaboration between members, locations, and departments.
- Minimize risk and compliance penalties.
- Access data anytime, anywhere via a single sign-on.
- Increase efficiency and productivity with your payroll and finances.

## Relax with confidence

# 2

In two easy steps,  
you're ready to start  
seeing the benefits  
of automation.

### How It Works

- 1 Enter your Sage Intacct GL credentials in APS. Click the button to sync your GL journal entries to Sage Intacct.
- 2 Our one-time setup allows you to customize your frequency, choose the date, and preview the file for truly automated accounting. So sit back and let the data flow.
