

Application of the TOR in Prayer

Most loving Creator of Reality and Giver of all life, we thank You for all You have done to draw us near—allowing us to be inseparable with You. That work of redemption is finished. No further deed is required to obtain Your gift of grace... it extends to the farthest reaches of the Earth to those who have never heard Your Name. Stir in us the desire to move beyond the milk of elementary traditions and instill in us an unquenchable thirst for the meat of perfection as children of The Light. Fill us all with Your Holy Spirit so that we may commune with You and each other above the plane of this temporary realm. Help us realize that we are not of this world because we don't fit in the 3rd dimension. Lead us out of ignorance as we learn to see the symbolism and parallels of nature and draw from that vast silent reservoir of revelation knowledge. May we come to know beyond any doubt who, what, and where we are. Expose Reality for what it is as You remove the scales of perception from our eyes and enlighten us to the infinite. Give us eyes to discern eternity simulating time and only now existing with You forever by our side—available to us in the utmost loving and caring way. Speak to our hearts while giving us ears to hear Your voice. Open our understanding to the potential inside of each of us to affect our shared Reality and to usher in Your will on Earth as it is in Heaven. Most loving God bring us together in beautiful harmony that reflects the essence of Your unconditional love. Help us let go of hatred, vindictiveness, and prejudice and give us tolerance for one another. Teach us to marvel at our cultural differences as You do and despite those differences, help all your children find common ground in the mechanisms of Nature. Deliver us from perishing for a lack of knowledge. Open our understanding to comprehend the reptilian brain for what it is and how it affects us so that we may stop heaping guilt upon ourselves. Let us finally grasp that we are so much more than the flesh we occupy. Put a desire in all of us to impart this knowledge to our children so they may understand their true place in the universe at an early age... while their faith only knows what God can do, and not what He cannot do. May we earnestly ask, seek, and find the miraculous in the present, and not focus solely on events of 2,000 years ago when Christ and His followers walked the earth—Who promised we would do even greater things. Let us now witness healing in our minds and bodies of diseases, afflictions, and addictions beyond the explanation of 3rd dimensional technology. Help us release a death grip on ownership and behave as stewards of things we have the privilege to control. Inspire us Lord to eliminate hunger, war, and violence in the world. Teach us to pray with that God kind of faith which draws from the unlimited substance of The Everything as we take responsibility for that which is entrusted to our care—Earth. Show us how to call things that are not to replace things that are. In doing so may we be able to co-create Heaven on Earth in cohabitation with each other as we walk in love... emulating You as Your dearly beloved children.

*In Jesus Name,
Amen.*
