

## How to add Any App

1. Select the **Settings** option from the top menu bar of your Firestick.

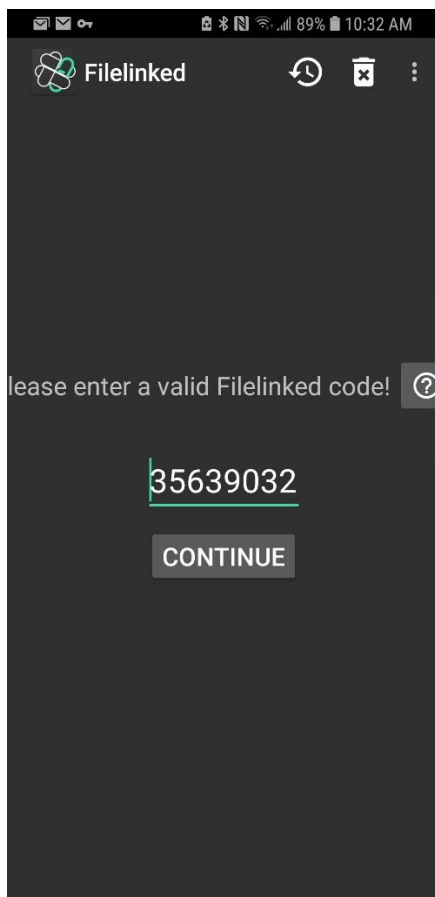

2. Select the **Applications** option.

3. After selecting **Applications**, scroll down to the **Filelinked** application and select it.

4. After selecting **Filelinked**, you will then select **Launch Application**.
5. Enter the code (if it isn't already populated) **35639032 (Or whatever FileLinked Store Code you are using)**. *You will see a POP UP asking you to sign up for a subscription. Select **DISMISS**.*

6. Select **whatever app you want to install** and click the download button (**arrow pointing down**). Allow the download process (**green bar**) to complete.
7. After the download completes, the download button will become a play button (**triangle pointing to the right**). Select the **PLAY** button and then select **Install**.
8. When Install completes, select **OPEN**.
9. You have successfully installed the App.
